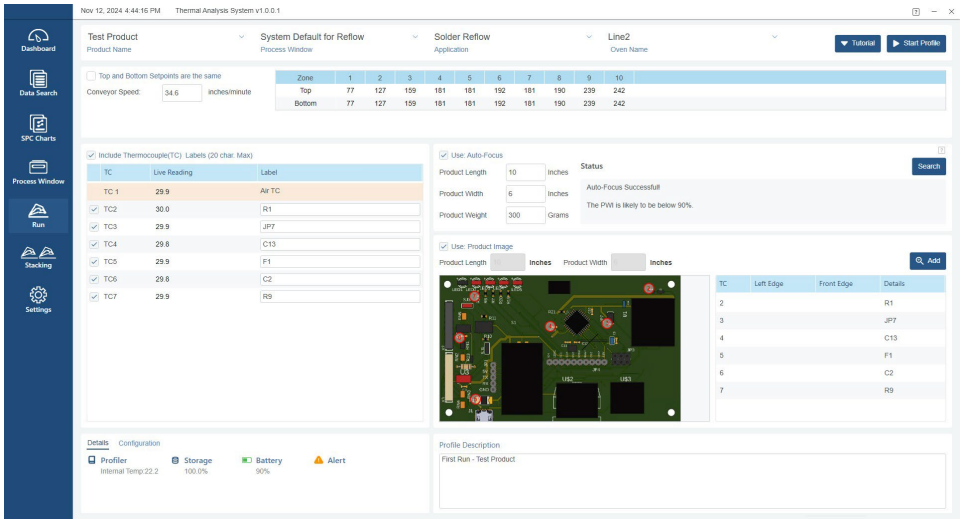
KIC to Showcase New TAS Software at IPC APEX EXPO 2025

New Platform Brings Enhanced User Experience and AI-Driven Features to Thermal Profiling Systems

San Diego — February 2025 —— KIC, the leader in smart thermal process technologies for electronics manufacturing, is set to exhibit at the 2025 IPC APEX EXPO, taking place March 18-20 at the Anaheim Convention Center. Visitors to Booth 3600 will experience the launch of KIC's groundbreaking TAS Software (Thermal Analysis System Software), designed to revolutionize thermal profiling by addressing emerging industry challenges and creating new opportunities for electronics manufacturers.



The TAS Software presents a major advancement in thermal management technology. It introduces a sleek, user-friendly interface that is both modern and streamlined, providing an intuitive experience for users. Enhanced with powerful AI integration, the software delivers actionable insights faster, enabling manufacturers to optimize their processes with minimal effort. This makes TAS Software an ideal solution for meeting the complex demands of today's electronics manufacturing environments.

Among the standout features of the TAS Software is KIC's award-winning Common Recipe Finder, a tool that automates the selection of optimized thermal recipes, ensuring consistency and peak performance across production lines."From AI-enhanced functionality to a radically improved user interface, the TAS Software is engineered to be a true game changer in thermal analysis. By building this platform to address specific, emerging challenges, KIC is providing customers with the tools they need to achieve superior process control and efficiency.

Current users of KIC's SPS system are encouraged to reach out to KIC for a TAS Software license. Join KIC at Booth 3600 during the IPC APEX EXPO 2025 to see the TAS Software in action and learn how it can transform your thermal profiling processes.
