Fossari®

Elevating performance and reliability

F.A.I.R., a renowned name in Italian shotgun craftsmanship, is proud of its Fossari line, a testament to precision engineering and uncompromising performance.

Since its inception in 1971, F.A.I.R. has been a trailblazer in crafting functional and exceptionally reliable Italian Hunting and Competition shotguns, distinguished by a host of features ensuring exceptional performance.

The inception of the Fossari line was driven by a singular vision: to craft shotguns tailored for Shooting Champions – those dedicated marksmen and women who demand nothing but the best. While F.A.I.R. has long provided shotguns suitable for hunting and shooting pursuits, Fossari represents a leap forward in meeting the specific needs of elite shooters.

Fossari has gone beyond the ordinary to create shotguns that elevate its shooting customers to new heights of performance. These shotguns are meticulously engineered to foster concentration, enhance mental focus, and facilitate the unwavering commitment demanded by the sport of shooting.

Every aspect of the Fossari line has been carefully considered and crafted to meet the exacting standards of elite shooters. From precision engineering to ergonomic design, Fossari shotguns are purpose-built to deliver unparalleled performance on the range and in competition.

Crafted for Excellence

The Fossari line embodies F.A.I.R.'s commitment to excellence, combining traditional craftsmanship with cutting-edge technology to deliver shotguns of unparalleled quality.

Reliability Redefined

Designed with the modern shooter in mind, Fossari shotguns are engineered for reliability in the field. Designed for the demanding atmosphere of competition shooting, Fossari shotguns deliver consistent performance, shot after shot.

Innovative Design

Featuring sleek lines and ergonomic designs, Fossari shotguns offer shooters a blend of style and functionality. Every detail is meticulously crafted to enhance the shooting experience, from the finely engraved receiver to the precision-machined barrel.

Versatile Performance

Whether you're breaking clays on the range or competing in a tournament, Fossari shotguns rise to the occasion. Available in a variety of configurations, there's a Fossari shotgun to suit every shooter's preference and needs.

Unwavering Quality Assurance

Backed by F.A.I.R.'s decades of experience and commitment to quality, Fossari shotguns undergo rigorous testing to ensure flawless performance and durability. With Fossari, you can trust that you're getting a shotgun that will perform reliably for years to come.

Action

A standout characteristic of Fossari® shotguns is their monolithic action frame. Crafted from a single piece of steel using a 5-axis CNC machine, this design incorporates Boss type latches with an oversized locking bolt aligned with the barrel's center. This ensures a consistent and secure lockup over time. To enhance durability and reliability, critical components are forged from solid blocks of steel.

XR-Trigger®

The Fossari® offers an optional XR-TRIGGER®, an adjustable trigger mechanism that allows for precise millimetre adjustments. This feature includes a conveniently placed button at the top of the trigger assembly for easy modification of the trigger's travel distance.

T-REX

The T-REX system features an interchangeable iron fore-end repositioning system. It includes numbered, interchangeable inserts made from special steel, allowing for precise adjustments to maintain tightness and correct any play resulting from extensive use.

IRF

All Fossari® models come equipped with a hardened, chromed steel interchangeable insert at the breech, enhancing the shotgun's longevity and resistance to wear and corrosion from ammunition gases.

Barrels, XBore, & X-Cones

Fossari® barrels are crafted from a special tri-alloy steel using the classic bar drilling method, ensuring concentricity and robustness. The X-CONES® feature long forcing cones that improve steel shot concentration and velocity. The internal XBORES geometry reduces recoil perception, and a chrome lining enhances durability, corrosion resistance, and shot pattern consistency.

XR-Stock®

The adjustable XR-STOCK®, available for both right and left-handed models, offers comprehensive adjustments for height, inclination, and cast with millimetre precision. Made from light alloy with robust steel supports, the stock adjustment plates are designed for maximum durability. Various thickness washers are included to customise the height.

Hinge Pins

Interchangeable hinge pins in Fossari® models add to the shotgun's value by enhancing its long-term serviceability.

Overall Construction

The action bodies, trigger plates, fore-end iron, and extractors of Fossari® models are all meticulously milled from forged ingots, ensuring top-tier quality. The integral action body features a removable and interchangeable trigger mechanism XBD, that can be easily adjusted without tools, simply by pressing a release button on the trigger unit. This not only offers a technical advantage but also simplifies maintenance and so on…

About

Renowned for their striking aesthetics and outstanding performance, F.A.I.R. shotguns continue to set the standard with their latest offerings.

Driven by a dedication to excellence, F.A.I.R. has achieved significant milestones in recent years, including the introduction of the side-by-side line and the launch of the highly reliable Competition shotgun under the FOSSARI brand.
