RC Presentation

RC Eximport industrial site in Forlì was founded by Mr. Vittorio Socci thanks to the passion that guides the various generations of the Socci family **since 1882**, and then managed by his son and daughter assisted by Sofisport Group after the acquisition, now part of FN Browning Group as well.

The distinctive sign of RC is characterized by the Family Company imprint, which makes it a dynamic reality in the international market, where RC Eximport is a leading company in the production of sports ammunition for the disciplines of Clay Pigeon Shooting and Hunting,

RC Cartridges are then an Italian Excellence in the world, supplier of the most prestigious Shooting Federations, present in over seventy countries worldwide and positioning at the highest levels of shooters' consensus and expectations.

The highest awards achieved in all the Olympic Games from Sydney 2000 to Paris 2024 confirm the long series of successes and satisfactions that reward the continuous commitment to making Excellence and the pride of being convinced ambassadors of the «Made in Italy».
