

TESTIMONIALS

What I have experienced with the **ROSS** system is that it thoroughly cleans and sanitizes both silicone and neoprene material AND the fabric material of our liners and suspensions. I simply put my liner in **ROSS**, put the lid on and press start.

Aristotle Domingo
Athlete and Advocate

As a Surgeon and Amputee, its easy to use, saves time, smells great, recommend!

Prof. Eyal Gur
Director of the Department of Plastic Surgery,
Ichilov Hospital.

I have always been very sensitive and embarrassed by the odor of my liner. **ROSS** has helped me regain my confidence as I now no longer worry about stump funk.

Annette Fox
Mother

ROSS is an amazing product and I really hope more amputees get to use it... It has made a huge difference in my life.

Caleb Swanepoel
Actor, Surfer and Shark Attack Survivor

In my 16 years of experience as an Orthotics and Prosthetics clinician, I can see the massive potential for **ROSS** becoming an important part in maintaining an effective and easy cleaning regime and standard.

Justin Rix
O&P Practitioner

We are very excited to offer **ROSS** as a solution to our clients and as an actual cleaning service for our Practice too.

Dr Robinson
O&P Practitioner

ROSS makes my life (as well as the lives of other amputees) easier and safer in regards to a better hygiene practice.

THE NEW STANDARD IN LINER HYGIENE

ROSS

Rapid Ozone Sleeve Sterilizer

A FRESH START.
EVERYDAY.

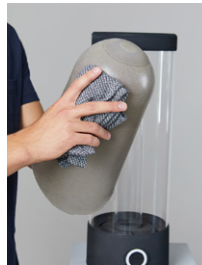

*"I depend on my liner,
my liner depends
on ROSS."*

ROSS was designed in response to a problem that all amputees unfortunately have. **Bacteria build up in a liner results in bad odor which not only causes the liner to smell bad, but the socket as well.** In some cases this odor permeates into the room where the liner is hung to dry.

ROSS uses the powerful and effective cleaning ability of ozone to eliminate this problem once and for all.

Wipe inside of liner to remove excess build up

Place liner inside **ROSS**

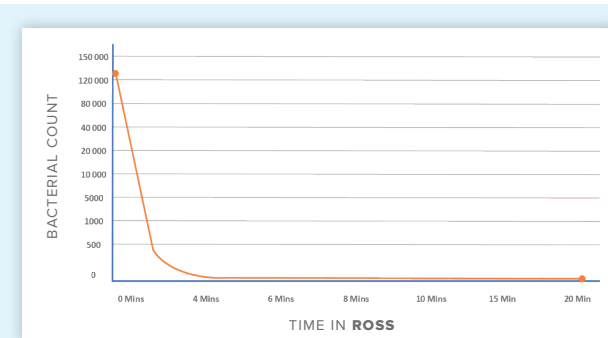

Select either 10 or 20 minute cleaning cycle

THE **WORLD'S FIRST** PROSTHETIC SLEEVE STERILIZER FOR YOUR HOME

- **ROSS** kills 99% of bacteria – soap and water does not.
- Soap can cause contact dermatitis – **ROSS** does not.
- Cleaning with soap and water is laborious and the liner takes forever to dry.
- **ROSS** works in 10 to 20 minutes.
- **ROSS** can be used while you sleep or while you eating breakfast. Anytime, anywhere.
- Many amputees struggle with liners that continually smell bad no matter what they do – **ROSS** has solved that problem.
- Orthotists have started using **ROSS** as a service in their practices.
- Some amputees use rubbing alcohol to disinfect liners. Alcohol dissolves the silicone material liners are made of – **ROSS** uses Ozone technology which is inert towards all liner materials.
- **ROSS** can be used on all liner types, even those with a pin locking system.
- **ROSS** is perfect for the next generation of prosthetic liner.

Every amputee should have a **ROSS** unit.

INDEPENDENT LABORATORY TESTED

Removes **99.9%** of bacteria.

ROSS is approved to sterilize all types of prosthetic liners. Pin liners, with pins attached, can be placed in **ROSS**.
