

STEM Education and Inspiration Through Robotics

- ★ **Super-Engages Boys AND Girls**, increases confidence and provides a fun “hands-on” learning environment for STEM and Programming.
- ★ Students learn REAL-WORLD robotics and programming skills with the world’s most powerful, versatile, and easy-to-use robot platform. Perfect for grades 5 to 12
- ★ Clip-together assembly - students can innovate and create their own robot designs and robotic applications

Easy to Implement

Complete course of interesting, minds-on lesson plans develop contextual understanding of robotics, scripting and programming

**Easy to Teach:
No Experience
Needed!**

Robotics Lab includes: 15 robots, software, training, and our Self-Directed Curriculum

Thematic, problem-based learning for STEM, GT, Robotics, CTE, Programming, Special Needs classes, etc
