# Digital Learning is Driving Change in Education

# Table of Contents

The shift to mobile delivery is happening at lightning speed across the country. Driven by lower priced devices and greater broadband accessibility, federal support for wireless networks is increasing with new E-Rate funds and public-private initiatives like Connect-Ed. As hundreds of thousands of devices are now being used in districts for personalized learning, the need for classroom-proven and durable headphones and headsets has never been greater. Even though districts have budget constraints, they want audio equipment that puts student needs first and delivers the greatest value.

Learning environments are in flux. The digital revolution is shaking up everything from professional development to school architecture. But what remains clear is that 1:1 and small group learning implementations are here to stay, and in this world, each student requires audio support that has superior sound quality, protects their hearing, and provides value. Blended learning, digital learning, project-based learning, distance learning, game-based learning, differentiated learning, mobile learning, gaming, and now assessments, are all integrating audio in more ways than ever before.

Educators depend on Califone to lead the industry with state-of-the-art, high-quality audio gear that supports learning and is durable enough to withstand the demands of day-in and day-out school environments – and has the [commercial warranty](#) to support it, unlike items made for less frequent consumer use. Many of our most popular models come with a [3-year warranty!](#) Califone continues to offer schools and libraries a partner who understands the role of technology in the digital world.

Not many are aware that the warranty for consumer items are voided if used in schools, because they're not manufactured for what's classified as "institutional" uses.

There's a difference between consumer items made for music listening and those made for language learning. Consumer focused headphones are made for music listening with its higher range of sounds. While our headphones and headsets can also be used for recreational listening, they're designed to focus instead on the narrower frequency range of the human voice needed for language learning. It's as simple as choosing the right tool for the job.

# Gaming Headset

Using digital games for learning is quickly becoming mainstream in K-12 classrooms across the country. Games offer a non-threatening and engaging way to teach or reinforce skill mastery. Sampling the variety of educational applications in MinecraftEdu® alone shows why game-based learning is a part of today's instructional tool kit.

Visit our blog to read more <http://bit.ly/1IBNBkx>

No matter how or where they're used, game-based learning and competitive gaming both require headsets to do more than ever before. Califone gaming headsets offer crisper and brighter audio than anything else we've ever offered. Our GH507 gaming headset offer cutting edge 5.1 and 7.1 Surround Sound for a more immersive audio experience. And with 3D Sound Effects, it will enable users to discern vital sound directionality within your game. Whether you're playing alone or as part of an online multiplayer team, the chat function allows users to strategize on the fly and better react to the game.

The GH507 gaming headset is designed for comfort during extended play sessions. The advanced inline audio features can be detached when not gaming so its 3.5mm plug can be connected with their 3.5mm plug into any smartphone, tablet, laptop/desktop or Chromebook.

This sturdy gaming headset provides premium audio for an immersive gaming experience. The GH507 is ideal for solo use and for playing as a team member with comfy over ear earcups to block external noise and are soft enough for long gaming sessions. The adjustable boom mic is ideal for online chat and can also be detached for listening only mode.

Xbox One™, Playstation 4, PC, Apple / MAC compatible.

**New!** GH507 \$83.99

Califone proudly supports professional gaming team Isolation Empire

The lighter weight GH131 gaming headset is ideal first upgrade from the standard headset you'd otherwise get out of a game box.

The GH131 boasts high fidelity 5.1 & 7.1 Surround Sound for a more immersive audio experience. And with 3D Sound Effects, it'll enable you to discern vital sound directionality within your game. Xbox One, Playstation 4, PC, Apple / MAC Compatible. The advanced inline audio features can be detached when not gaming so it can be connected with its 3.5mm plug into any smartphone, tablet, laptop/desktop or Chromebook.

## 3068 Headphones & Headsets

*District bids specify the 3068AV more than any other model in the country - and now it just got safer, better, and smaller! With language and STEM programs becoming more active, we've added a noise-cancelling microphone for enhanced engagement! The 3068 series is also available as a smaller sized headphone for younger listeners - the 1534BK.*

Dependable, durable, and tailored for the frequencies of the human voice, the frequency range of the 3068 is designed for learning instead of the wider band width used for music listening by consumer-oriented headphones.

Its proven superior speech intelligibility delivers in critical assessments, digital programs, or game-based learning. New refinements include slotted baffles that protect internal speakers from accidental perforation while individual volume control on the earcups delivers a customized experience for each student.

Updated comfort features include an adjustable headband and earcups that reduce pressure but still block ambient noise. The 3068AV headphone is compatible with iOS, Android, and Windows-based devices.

### 3068 Headphones

**3068AV-10L** Ten 3068AV headphones without storage case \$191.60

**3068-12** Twelve 3068AV headphones with foam-lined storage case \$300.60

# Promote Anywhere, Anytime Learning with First Class Audio

Extend proven audio technology to school or student-owned mobile devices with our headsets equipped with USB or To Go™ plugs. With the correct plug connection, they're compatible with iPad®, Chromebooks®, Surface® and other tablets, laptops, netbooks, Kindle®, Nook®, other eReaders, and smartphones across all major operating systems (iOS, Android & Windows).

Califone headsets have been designed to meet the specific speaking, listening, and language development ELA standards while offering school-specific warranties that consumer products can't match. As with all Califone headsets, rugged and durable materials stand up to the rigors of active classrooms and many offer a two-year warranty.

## Deluxe Multimedia Stereo Headset

The high quality audio of this headset is ideal for blended or online learning, assessments, and gaming. This popular headset has proven that it can stand up to repeated student use over multiple years. The noise-reducing earcups and (reinforced) boom microphone with individual volume control deliver a comfortable and customized sound experience.

## 4100 Series

Your students will be immersed in the rich media of digital learning with this state-of-the-art headset. Whether they're engaged in language development, tutorials, assessments, or project-based learning activities, the 4100's audio quality ensures that students remain focused on the task at hand. The comfort-sling headband evenly distributes the headset's weight, making it very comfortable to wear.

## Discovery™ Headsets

New ELA standards place even greater importance on listening and speaking skills than in the past. That's why the speech intelligibility of Califone headsets is so important. Schools depend on our audio products to help their students achieve academic success. These heavy-duty headsets are proven workhorses in classrooms, labs, and libraries across the country.

The noise-cancelling microphone on the Discovery is designed for voice recognition software and is why the Discovery headset is so widely used for both language activities and game-based learning. The industry's deepest ear cups also make this one of the most comfortable. The headband's flexible comfort sling more evenly distributes the weight. The innovative phone-style clip enables you to quickly change the cord so the same headset can be used in either monaural or stereo modes.

**DS-8VT** with single 3.5 mm stereo To Go™ plug, rigid boom arm plug \$52.30

**DS-8VUSB** with USB plug, rigid boom arm plug \$65.00

# Earbuds

Califone earbuds are an affordable alternative for budget-constrained schools trying to meet daily classroom needs, new benchmark assessments and state testing requirements. The features on the E3 series are why the second largest district in the country (and others) has already adapted these earbuds for use in their assessments. All three E3 models are the first earbuds to offer a one-year warranty!

### Headsets

**E3T** with mic and inline volume controls, 3.5mm To Go™ plug, comes with an extra pair of ear pads for smaller ears \$5.90

**E3USB** with mic and inline volume controls, USB plug, comes with an extra pair of ear pads for smaller ears \$9.60

### Headphones

**E3** with inline volume control, comes with an extra pair of ear pads for smaller ears \$4.45

**E2** with inline volume control \$4.40

**E1** no volume control \$1.60

**New!** EP-E3 50-pairs of replacement earpads for E2 & E3 earbuds \$10.50

# Titanium™ Headsets & Headphones

Schools depend on the high-performing audio technology of Titanium™ headsets and headphones for the demands of traditional and new digital learning. Quality sound helps students achieve their goals in ELA/Math as well as STEM and STEAM initiatives. These headsets and headphones feature multiple breakthroughs in safety, performance, comfort and durability including the highest level of ambient noise-reduction available for today’s students. Built-in volume restriction prevents the sound level from exceeding the ASHA-recommended 85dB limit. Replaceable cords (some with a lifetime warranty) extend the lifecycle of the headsets and headphones. Some are even 100% washable (without the cords) in soap and water. Choose between single To Go™, dual 3.5mm or USB plugs.

## Headsets

## Teacher-tested

### 610™

Schools rely on audio equipment that can stand up to frequent student use and deliver great value. The 610 binaural headphone has long been used to support literacy development. The durability of the 610 increases its utility to schools. The headband has a “memory” feature that allows it to spring back into shape no matter how it is bent or twisted. Windows, Android and iOS compatible.

- 610-44S** 3.5mm stereo plug, non-replaceable cord \$19.00

cords available  
online

## Explorer™

High-fidelity sound is a must for students to master new listening and speaking standards. Students must be able to clearly hear and understand spoken language to demonstrate ELA proficiency. Dynamic, thin Mylar® diaphragm speakers raise the bar for this educational computer headphone. Teachers and librarians depend on the Explorer for monaural use in ELL/ELS programs. These headphones can also be used in stereo mode for gaming situations and in learning centers. iOS, Android & Windows compatible.

- EH-521** Switchable stereo/mono, 3.5mm plug with 1/4" screw-on adapter, replaceable cord \$23.60

# Superior™ Stereo Headphone

These high-fidelity stereo headphones have earned their "favorite" status from both students and teachers. In addition to delivering an exceptional sound experience, ambient over-ear-noise-reducing earcups protect young ears by reducing the need to increase the volume. These comfy headphones are just right for ELA learning and assessments. Replaceable over-the-ears leatherette earpads and a 1/4" adapter are standard features.

**SA-740** \$41.60

**2924EC** 24-pack of disposable cloth earpad covers (12 pairs) for SA-740, 3068AV & 2924 series \$22.00

The comfort-sling headband and the deep, over-ear earcup make this headset ideal for backstage, on the field or classroom use.

**SA370** single ear headset \$50.80

# Listening First™

ELA standards emphasize listening and speaking for our youngest learners, so it's critical to start them off with headsets and headphones that are calibrated for optimizing speech intelligibility. Listening First headsets and headphones are specifically sized to fit smaller students. Although the size and weight of the age-appropriate headsets and headphones are "just right" for our youngest students, they are packed with the same safety features as our larger models. Slotted baffles protect the internal speakers from accidental perforation, and ambient noise-reducing earcups help block external noises to keep students focused and on task.

They are ideal for computers, mobile devices, assessments and gaming. Both headsets and headphones are available with the appropriate plug so they can be used with Android, iOS, and Windows devices as well as Chromebooks, tablet, smartphones, desktop and laptop computers.

## Odyssey™

Help students retain focus while protecting their hearing with these exceptional ambient-noise reducing earcups. The Odyssey headphones are a dependable choice for K-12 language labs, classrooms, or libraries. These headphones are compatible with all operating systems (Android, Windows, iOS). Its replaceable cord enables the same headphone to operate in either mono or stereo mode for additional flexibility. Broken headphone cords can be replaced without purchasing a new headset body. Replaceable, easy-to-clean vinyl ear cushions are hypo-allergenic, no latex.

- OH4V-10L** Ten-pack OH-4V without case \$248.60
- OH-4V** 3.5mm stereo plug \$24.60
- OH-1V** 3.5mm mono plug \$22.20

# Stereo Headphones

With increased focus on digital learning, it is important to help students remain engaged and on task for long periods of time. Built for student comfort and safety, these sturdy headphones are designed specifically for multimedia applications. An adjustable headband ensures a secure fit while slotted baffles prevent accidental speaker perforation. Ambient noise-reducing earcups and individual volume control protect student hearing. Leatherette ear pads are cleanable and replaceable.

**2924AVPS-12** Twelve 2924AVPS with storage case \$329.60

**2924AVPS** Beige \$24.50

# Sound Alert™ Headphone

Research from the American Speech-Language-Hearing Association indicates that more than 40% of the time students set the volume too high on their audio devices. These stereo headphones have a red warning light, which activates when the sound level exceeds the recommended limit of 85 decibels. Use of these headphones helps educators monitor the sound level of what students are listening to.

**2985PG** \$86.00

**EP3030**  
Fits 3068 series \$4.00

**EP306x**  
Fits all 3060 and 3064 series \$4.00

# Wireless Listening System

This wireless listening system allows teachers to more easily manage differentiated instruction in their classrooms. It can also be used during back to school night where a dedicated frequency could be committed to translation in a certain language. Students can self-pace their own study, and every student can be working at the exact right level for them. All three available system frequencies can operate simultaneously within their 100' range, allowing different groups to work on different tasks on different devices.

**CLS725-4-03**  
shown

1886 not included

Input from any audio source.

Connect a mic to transmit instructions

Each package includes wireless headphones with a matching color-coded wireless transmitter. Plugging a microphone into the transmitter allows students who are listening on the transmitter's frequency to hear instructions and announcements.

- CLS7XX-4-03 4-person system with headphone rack \$424.00
- CLS7XX-4 4-person system without headphone rack \$323.00

## When ordering a Wireless Listening System

Choose a color "code" and insert into CLS7XX-4 to order part number ie: "CLS725-4"

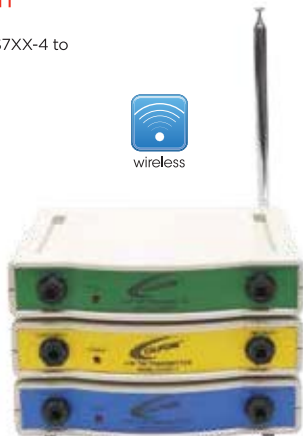

### Color Code Choices:

- "21" = "Yellow"
- "25" = "Blue"
- "29" = "Green"

## Wireless VHF/FM Transmitter

Easily connects to any audio source

- CLS7XXT \$91.00
- CLS7XX Wireless headphones for adding more listeners \$68.00

Create you own wireless computer learning station

Infrared transmitter plugs into a computer's USB port

**HIR-KT4** shown with included transmitter

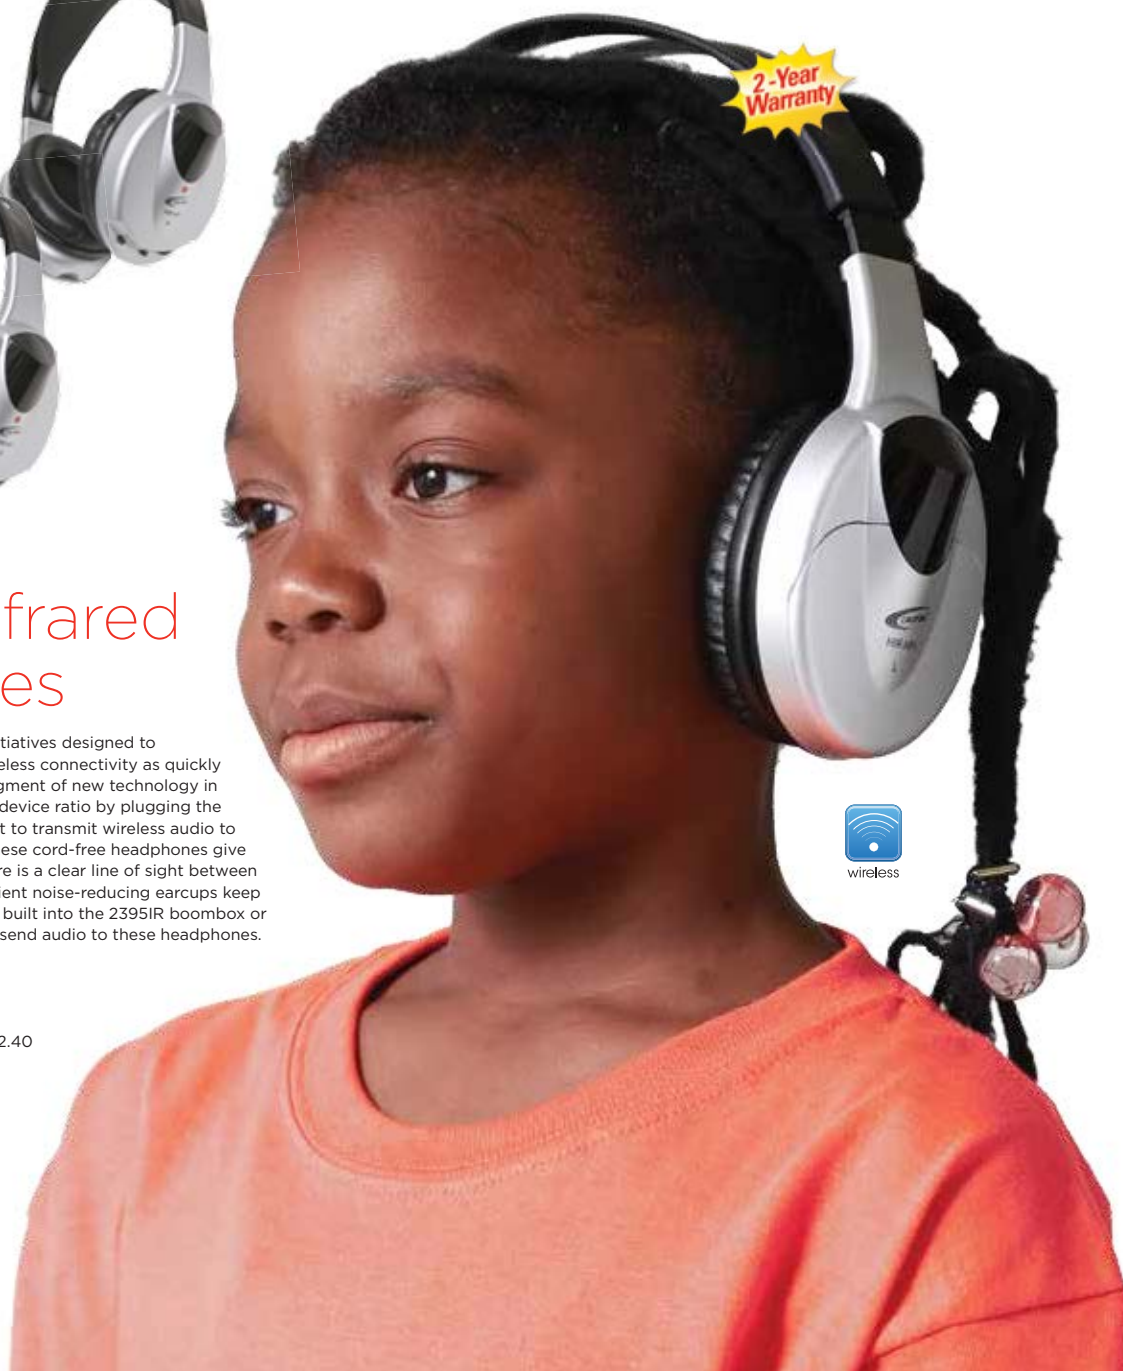

**2-Year Warranty**

## Wireless Infrared Headphones

With new E-Rate rules and ConnectEd initiatives designed to help schools ramp up bandwidth and wireless connectivity as quickly as possible, this is the fastest growing segment of new technology in schools today. Optimize your student-to-device ratio by plugging the detached USB transmitter into a USB port to transmit wireless audio to an individual student or a small group. These cord-free headphones give students up to a 20' range as long as there is a clear line of sight between the transmitter and the headphone. Ambient noise-reducing earcups keep them focused and engaged. Transmitters built into the 2395IR boombox or 3432IR cassette player/recorder will also send audio to these headphones.

- HIR-KT4** Four headphones with a single transmitter \$271.20
- HIR-KT1** Headphone with transmitter \$102.40
- HIR-HP1** Additional wireless headphone without transmitter \$56.40

*Infrared Music Maker Plus transmits to the wireless HIR-HP1 headphones. Learn more about it on page 41.*

# Califone and the American Speech-Language-Hearing Association (ASHA) Partner to Protect Student Hearing

Click for more information  
[listentoyourbuds.org](http://listentoyourbuds.org)

As schools become increasingly connected to mobile devices for anywhere, anytime learning, students are spending more time wearing headphones at school and at home. Whether engaged in watching videos for flipped instruction, listening to music or language lessons, or even gaming, protection of student hearing is essential. Califone and ASHA work together to protect student hearing by highlighting the dangers of sound exceeding 85 decibels. Our efforts remain important as early awareness and protection help students prepare for a lifetime of digital engagement.

## Active Noise Canceling Headphone

Califone has once again set the educational standard with the first active-noise canceling headphone designed specifically for classroom and library use. Our proprietary technology blocks external noise and enhances sound quality by improving speech clarity making it easier to isolate key words, tones, and inflections without increasing volume. Sound distortion is minimized increasing perceived volume without actually raising the volume. Students are able to remain focused on the task at hand whether listening to music, studying, or taking a test. This superior headphone will exceed your expectations.

## Hush Buddy™

For some students, it's important to provide additional levels of sound protection. Our Hush Buddy earmuffs sound deadening only (no connecting cord to an audio source) are the industry's quietest earmuffs at 27dB. These are the perfect option for students who have difficulty staying on task. They are available in three engaging animal motifs.

- HS-BE** Bear \$24.60
- HS-PA** Panda \$24.60
- HS-TI** Tiger \$24.60
