FOR IMMEDIATE RELEASE

HKK USA to Unveil the A02 MAX Holographic Sight at SHOT Show 2027, Eliminating the Industry Delamination Flaw

The next evolution in tactical optics features a titanium-alloy core, zero NVG bloom, and proprietary Tri-Fuel™ technology at an unmatched 8.08 oz.

KIRKLAND, Wash. – January 19, 2027 – HKK USA, a rising force in duty-grade tactical optics, today announced it will officially debut its flagship A02 MAX Enclosed Holographic Weapon Sight at the 2027 SHOT Show in Las Vegas. Engineered from the ground up for the modern professional, the A02 MAX solves the industry's most chronic optical flaw—delamination—while introducing unprecedented power versatility and weight reduction.

For decades, operators and professionals have accepted delamination, thermal shift, and heavy, bulky protective hoods as the mandatory compromises for running holographic sights. The HKK A02 MAX shatters this paradigm. By integrating a precision-machined 6061 aluminum housing with an embedded titanium-alloy core, the A02 MAX delivers battle-proven ruggedness without the need for external shrouds, bringing the total weight down to a mere 8.08 ounces.

> *"We looked at the legacy optics currently dominating the market and saw unacceptable compromises," said Henry, Head of HKK USA. "Professionals shouldn't have to worry about their reticles fading or their glass delaminating after a year of hard use. We engineered the A02 MAX to be the ultimate, zero-distortion optical advantage—built for the extreme and flawlessly compatible with modern night vision."*

Beyond structural integrity, the A02 MAX introduces proprietary **Tri-Fuel™ Technology**. In high-stakes environments where supply chains are unpredictable, the A02 MAX ensures operators are never limited by logistics, functioning seamlessly with multiple battery types. Coupled with its flawless Night Vision (NV) performance that guarantees zero reticle bloom under NODs, the A02 MAX is mission-ready out of the box.

A02 MAX KEY FEATURES:

- **Delamination-Free Architecture:** A permanent solution to the sagging, cracking, and delamination plaguing legacy holographic sights.
- **Titanium-Reinforced Core:** Extreme impact resistance in an 8.08 oz ultra-lightweight profile.
- **Tri-Fuel™ Versatility:** Multi-battery compatibility for uninterrupted tactical deployment.
- **Pristine NVG Performance:** Absolute optical clarity with zero bloom under night vision (10 NV settings).
- **Duty-Grade Durability:** IP68 fully waterproof and enclosed design with a 10-year electronics / lifetime housing warranty.
- **Competitive Pricing:** MAP set at $499.00 to disrupt the premium optics market.

Visit HKK USA at SHOT Show 2027:
Dealers, media members, and LE/MIL procurement officers are invited to experience the A02 MAX firsthand. HKK USA will be actively accepting new dealer applications for the 2027 fiscal year, offering highly competitive margins, dedicated support, and zero minimum order quantities (MOQ) for early partners.

ABOUT HKK USA

HKK USA engineers duty-grade tactical optics built for the extreme. We deliver pristine optical clarity, ultra-rugged housings, flawless NVG compatibility, and our proprietary Tri-Fuel™ technology. Driven by innovation and user feedback from the tactical community, HKK USA is committed to providing uncompromised performance for the modern professional.
