FOR IMMEDIATE RELEASE

BulletProof Speedloaders Announces the Upgraded TIER-1 AR-15 Speed Loader

Premium magazine loader delivers fast, durable performance for AR-platform shooters

Corona Ca — [23 July, 2026] — BulletProof Speedloaders, a designer and manufacturer of innovative speed-loading solutions, today announced the launch of the upgraded TIER-1 AR-15 Speed Loader.

Precision-machined from aircraft-grade aluminum and protected by a scratch-resistant anodized finish, the TIER-1 is engineered for fast, effortless loading of virtually any cartridge compatible with standard AR-15 magazines, including 5.56 NATO, .223 Remington, and .300 Blackout.

Designed for range use, competition, training, and professional applications, the compact and lightweight TIER-1 combines precision craftsmanship with mission-ready durability and reliability.

“Shooters asked for speed without sacrifice,” said Donnie Jones, Director of Sales at BulletProof Speedloaders. “We built the TIER-1 to be the loader you can trust every time—rugged, reliable, and ready, no matter how hard you run it.”

The TIER-1 is available in a variety of colors and finishes, with customizable body, lever, and hardware combinations. Every unit is backed by the BulletProof Triple R Lifetime Guarantee: Replace, Repair, or Refund.
