Meadow Creek Mounts Helps Dealers Build Complete Red Dot-Ready Shotgun Packages

Shotgun rib mounting solutions give retailers a simple way to connect the shotgun, optic and mount in one compatible setup.

CAMPOBELLO, S.C. - September 23, 2026 - Meadow Creek Mounts is helping firearms retailers simplify one of the questions increasingly encountered at the gun counter: How do I put this red dot on this shotgun? Meadow Creek Mounts' Low Profile Rib Mounts attach directly to a shotgun's ventilated rib, allowing dealers to pair compatible shotguns and red dot optics without requiring drilling, tapping or permanent modification to the firearm. Visit SHOT Show Booth 41052, Lower Level of The Venetian, to see the system in person.

CORE PRODUCT BENEFITS

- Low, forward optic placement on the ventilated rib for a streamlined sight picture.
- No drilling or tapping required for the Low Profile Rib Mount system.
- Gun-specific and Universal options provide solutions across a range of shotguns.
- Multiple popular optic footprints let dealers pair mounts with a variety of red dots.

A COMPLETE PACKAGE AT THE GUN COUNTER

For retailers, that compatibility creates an additional sales opportunity. A customer shopping for a shotgun can also be shown a compatible red dot and the mount needed to bring the two together, providing a straightforward path to purchasing a complete red dot-ready shotgun setup in a single transaction.

> “Dealers are in a unique position because they often have the shotgun and the optic sitting under the same roof,” said Greg Maher, founder and owner of Meadow Creek Mounts. “Our goal is to make it easy for them to connect those products. Instead of telling a customer they’ll have to figure out how to mount an optic later, the dealer can help them leave with a complete setup that works together.”

Meadow Creek Mounts positions the optic low and forward on the ventilated rib rather than on the shotgun’s receiver. This placement maintains a streamlined profile while providing a natural field of view and fast target acquisition for hunters. The company offers gun-specific rib mounts designed around the rib dimensions of individual shotgun models, as well as Universal Rib Mount options for customers who want greater flexibility. Mounts are available for multiple popular red dot footprints, allowing dealers to build packages around a variety of shotgun and optic combinations.

Rather than treating the shotgun and red dot as unrelated purchases, retailers can present customers with a compatible three-part solution: Shotgun. Red dot. Meadow Creek Mount.

MEDIA INVITATION

SHOT Show Booth 41052 - Lower Level, The Venetian
Members of the media are invited to stop by for a hands-on demonstration of the Low Profile Rib Mount, interview Greg Maher and the Meadow Creek Mounts team, and learn more about the company’s shotgun optic mounting solutions. Media representatives interested in future product testing and reviews may also request product samples at the booth or by contacting greg@meadowcreekmounts.com.

ABOUT MEADOW CREEK MOUNTS

Meadow Creek Mounts is a South Carolina manufacturer of innovative mounting solutions for hunters and shooting enthusiasts. Based in Campobello, S.C., the company designs and manufactures products with an emphasis on practical solutions, simple installation and dependable performance in the field. From shotgun mounting systems to optic-and-mount packages, Meadow Creek Mounts develops products around real-world needs encountered by hunters, shooters and firearms retailers.

No drilling. No tapping. No compromise.
