WMD Guns LLC

At WMD Guns LLC, we believe that performance is earned—not promised. We are a firearms and high-performance coatings business built for customers who demand uncompromising quality, reliability, and attention to detail.

As a firearms manufacturer, we design and build firearms, components, and specialty metal coatings engineered for those who expect more from their equipment. Whether it's precision, durability, protection, or distinctive finish, our focus is always the same: deliver products and craftsmanship that stand up to demanding expectations.

Our business is built on three principles: **honesty, integrity, and customer loyalty.** We believe in doing what we say, communicating openly, treating customers with respect, and standing behind the work we put our name on. We don't believe a sale is the finish line—it's the beginning of a relationship.

That commitment is especially clear in our coatings. **We stand behind our coatings for life.** It's our way of putting real weight behind the quality of our work and giving customers confidence in their investment.

We're proud of what we build, proud of how we serve our customers, and never satisfied with simply meeting the standard.

WMD Guns LLC delivers performance you can trust, craftsmanship you can see, and a commitment that lasts for life.
