

Professional Learning with TeachFX

Our unique workshops use the groundbreaking TeachFX tool to help you increase student engagement

Over the last year, 600+ schools have used the TeachFX tool, and [teachers increased their student participation by an average 12.6 minutes per class](#). Our PD workshops model for teachers, coaches, and school leaders how to use classroom data from TeachFX to transform instruction. Here's how it works:

1

We give participants free use of the TeachFX tool, which uses artificial intelligence (AI) to provide insight on student engagement.

2

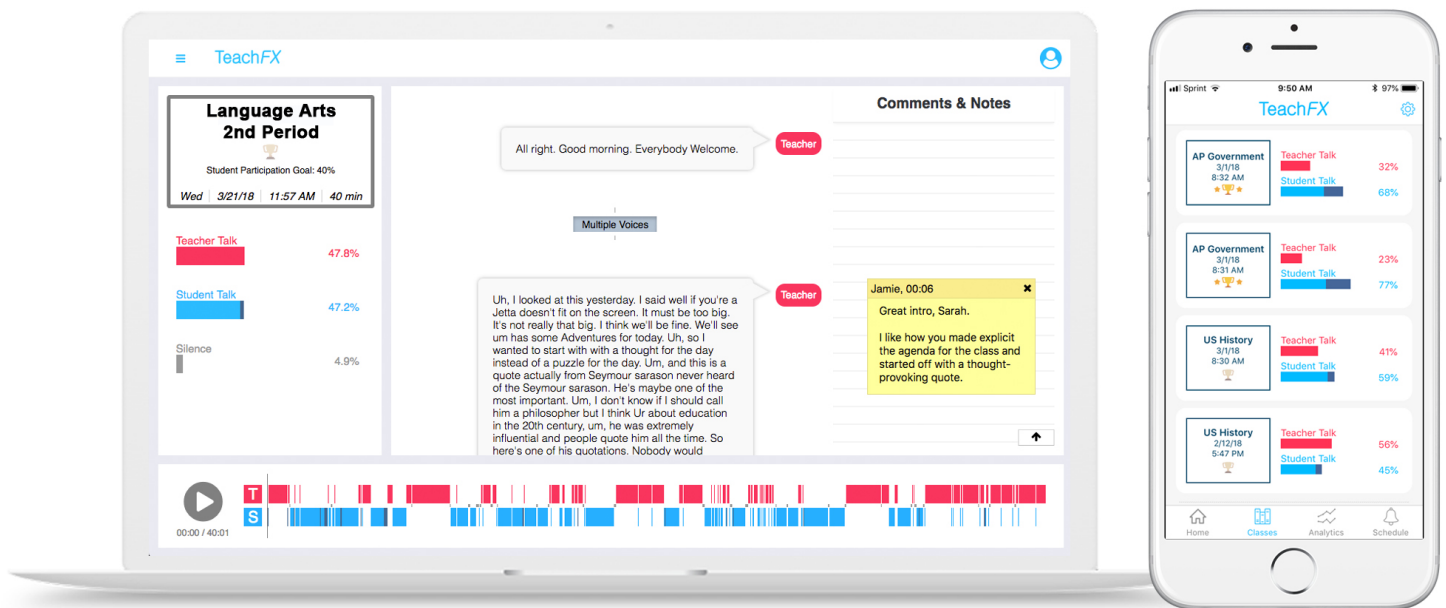

Before the workshop, every participant records one of their classes with the tool — and coaches and administrators record their coaching or observations.

3

In the workshop, participants learn to interpret their class data, collaborate better in teacher teams and coaching relationships, and improve instruction.

The magic of our workshops: every educator works with data about their own teaching practice — data they've never seen before! We show teachers how to use their TeachFX report to work on things like their talk ratio, wait time, questioning techniques, lesson design, uptake, and more. And we model how teacher teams and coaches can leverage TeachFX data in collaborative settings to address areas of growth.

The TeachFX Tool

Our Focus Areas

Our professional learning centers around giving students voice, and helping teachers gain awareness of their students' engagement. We help schools and districts use this lens to address a variety of pressing concerns they may be facing. We offer professional learning sessions with the following focus areas:

Boosting Student Engagement • **Promoting Teacher Collaboration** • **Authentic Questioning**

Understanding Wait Time • **Improving Classroom Management** • **Supporting SWDs**

Encouraging Academic Discourse • **Escaping I-R-E** • **Supporting ELLs**

Lesson Design • **Equity Centered Instruction** • **Supporting Low-Income Students**

Our Facilitators

David Brazer
STANFORD GSE PROFESSOR

David is a Professor and the Faculty Director of Leadership Degree Programs at Stanford's Graduate School of Education. His research and writing focuses on the challenges of school and district leadership, exploring how those challenges are met in practice. Previously, he spent 15 years in K-12 education as a teacher and high school administrator.

Jamie Poskin
TEACHFX FOUNDER & CEO

Jamie's experiences as a high school English and math teacher in New York City led him to create **TeachFX** with the mission of promoting more meaningful and equitable classroom dialogue. Jamie is also a former experimental theater director and artist with The Wooster Group and his own company. He has a BA, MA in Education, and MBA from Stanford University.

Testimonials

Than Healy
ADMINISTRATOR

"This is feedback we give to our best teachers all the time and is the kind of challenge you can chase your whole career."

Matt Hicks
ENGLISH TEACHER

"I'm getting a lot value out of it. I thought my students talked way more than they did. I set my goal for student talk at 40% and for a while I never had higher than 20%. I was stunned. It helped me step back and reflect on my perception of my teaching vs. the truth... my idea vs. reality."

Sherry Mao
ASSISTANT PRINCIPAL

"It's revolutionary — it quantifies something I've cared deeply about for ten years as an educator."

Lindsay Head
2ND GRADE TEACHER

"I am loving this app. It is making more aware of how much teaching / facilitating and how much student talk is going on! My class and I have set goals and it is creating much more independence in the room with explanations about their thinking!"

Aviran Sethi
DISTRICT ADMINISTRATOR

"This tool truly gives you 50% more bang for your buck with your APs and instructional coaches."

Stephen Kuehner
SPANISH TEACHER

"I was talking more than what probably would've been helpful for learning. It's made me more mindful of that."

Brenna Connelly
3RD GRADE TEACHER

"I love TeachFX!"

Angela Ebner
ADMINISTRATOR

"The tool is great for mentor teachers working with new teachers. It makes the conversation more data-driven, and less about 'attacking' the teacher."

Alexandra Lowenstein
4TH GRADE STUDENT

"It was nice when my teacher got this because before she always talked for like 5 minutes straight!"

Michael Innes
HIGH SCHOOL STUDENT

"Once Mr. Richardson started using TeachFX our class got way more engaging. We started doing these micro-debates, which were really fun. And simulations. It was awesome."

Arif Virani
SCIENCE TEACHER

"I'm using it every day. It's made me be more purposeful with my planning."

Amy Chase Gulden
INSTRUCTIONAL COACH

"Holy crap. This is incredible."

Carmen Powell
5TH GRADE TEACHER

"Thank you for helping me be a better teacher."
