

New Displays From Navajo Inc.

Denver based Navajo Inc., with over 35 years of merchandising experience, is proud to present three new visually stunning merchandising solutions.

The first is a floor display for Salute! cleverly shaped like a bottle to draw attention to the wine and bar accessories for sale. Your customers will love the array of products ranging from gift bags to flasks to pocket corkscrews and the unique shape of the display is sure to grab attention.

Our Hottips 2-sided Floor Spinner Display has the perfect mix of chargers for Apple and Android devices, earbuds, bluetooth speakers, and other electronic necessities. On-the-go charging devices are in high demand for busy lifestyles. And as charging stations at airports fill up, Hottips Portable Power Banks are a modern solution. Bright and eye-catching graphics on the display and the Hottips products will make this spinner the first-look spot in your store.

The Piranha One and Done Sunglass Display is not only a high quality display, but includes our best selling sunglasses and accessories of the season with a high profit margin incentive. This display is easy to set-up with all sunglasses under 1 SKU and a small foot print. Each display also comes equipped with mirrors to encourage customer interaction with the product.

Navajo is well-versed in the needs of convenience, mass merchandise, drug stores, grocery, and specialty retailers nationwide. Each of our displays is created in our woodshop by expert craftsmen who are constantly thinking up new design ideas. Don't miss out on these dazzling merchandising opportunities or future ones to come. Look for us at the 2016 ASD Market Week.
