FOR IMMEDIATE RELEASE

Redstone Manufacturing Brings Lights-Out 5-Axis CNC Production to Supplier Showcase Reloaded

High-volume, 24/7 automated machining for complex firearms parts

SEATTLE. Redstone Manufacturing will exhibit at Supplier Showcase Reloaded during SHOT Week in Las Vegas. Visit Booth 56032 on Wednesday, January 20, from 9:00 a.m. to 4:30 p.m., and Thursday, January 21, from 8:30 a.m. to 4:00 p.m.

5-AXIS CNC	24/7 AUTOMATED	LIGHTS OUT
Seattle machining shop	Robotic automation	Complex firearms parts

Lights-out production is Redstone's specialty. The company's Seattle 5-axis CNC shop uses robotic automation to run highly complex firearms parts around the clock, 24 hours a day, 7 days a week. For brands that need high volume on parts that are hard to make, that means steady output day and night.

Redstone makes custom metal parts for U.S. firearms and optics brands. It also produces metal injection molded (MIM) parts.

For rifles and pistols, Redstone makes triggers, hammers, bottom metals, magazine boxes, slides, magwells, finger ledges, stocks, centers, scope mounts, Picatinny rails, red dot housings, and aluminum hand grips.

Have a tough part and a big volume? Stop by Booth 56032, see sample parts, and talk through your drawings with the team.

About Redstone Manufacturing

Redstone Manufacturing makes custom metal parts for U.S. firearms and optics brands from its Seattle 5-axis CNC shop. Learn more at redstonemanufacturing.com.
