FOR IMMEDIATE RELEASE

BOOTH 60111

PROHEAR Redefines Tactical Audio at SHOT Show 2027 with Breakthrough 067 Comms Headset and Solar-Powered 023S DSP Earmuff

Engineering mission-grade hearing protection that fuses tactical dual-channel coordination, millisecond impulse suppression, and limitless solar endurance.

LAS VEGAS, NV — SHOT SHOW 2027 — BOOTH 60111

PROHEAR, a premier brand specializing in advanced acoustic safety and hearing protection, today unveiled its next-generation tactical ecosystem at SHOT Show 2027 in Las Vegas. Headlining the showcase at **Booth 60111** is the groundbreaking **067 Tactical & Comms Headset**, alongside the innovative **023S Solar & DSP Earmuff** and the new **038BT**, raising the benchmark for tactical operators, instructors, and dedicated shooters.

PROHEAR 067 Tactical & Comms Headset

FLAGSHIP COMMS

Engineered for seamless field coordination and lethal-level noise suppression (NRR 26dB). Features dual-channel comms with dual PTT readiness, 5-level ambient awareness with mission-tuned profiles, robust EMI/RF shielding against radio frequency interference, and a ventilated low-profile headband tailored for helmet integration.

PROHEAR 023S Solar & DSP Earmuff

SOLAR INNOVATION

Equipped with an integrated solar panel system that harnesses sunlight to extend runtime in the field, eliminating battery anxiety. Combines high-speed DSP transient noise compression (SNR 29dB), Bluetooth 6.0, a 4-mic directional array for realistic 360° situational cues, and a modular swappable outer shell system.

PROHEAR 038BT Bluetooth & Digital Earmuff

DIGITAL SERIES

Features ultra-stable Bluetooth 6.0 wireless connectivity, DSP transient suppression that clamps impulse gunshot peaks in milliseconds, a 4-mic array, ENC clear voice microphone, and premium memory foam cushions (SNR 29dB).

> *"Shooters and tactical operators shouldn't have to choose between situational awareness, clear radio communication, and battery life. Our new lineup eliminates these compromises by integrating active solar charging with military-grade communication standards."*

Industry reviewers, tactical media professionals, and range officers are invited to visit **PROHEAR at Booth 60111** for live audio simulations, hands-on tests, and media evaluation kits.
