BOOTH 51324

LAS VEGAS, January 2027 — Ammo Rx, a veteran-owned ammunition manufacturing partner, will feature its metal finishing and parts washing systems for ammunition production at booth 51324 in the SHOT Show 2027 Supplier Showcase, held Jan. 18–19, 2027, in the Palazzo Ballroom on Level 5 of the Venetian Expo in Las Vegas.

Ammo Rx washing systems remove metal forming fluids, lubricants and coolants from cups, cases and bullets using aqueous chemistry, with rotary drum, rotary basket, inline tank and continuous-feed configurations. Its pickling systems remove oxides and scale after annealing to leave clean, bright surfaces, and its polishing options, including dry media, wet burnishing, vibratory, centrifugal disc and barrel finishing, clean and polish brass cases, bullets and finished cartridges.

Each system is sized to the application, from small batches to tens of thousands of pieces. Ammo Rx also supplies the consumables to run them, including parts washing, pickling and polishing compounds, dry and burnishing media, and wastewater treatment chemicals.

Sister company Finishing Rx, which supplies metal finishing equipment, media and process support, will exhibit at booth 51322.

SUPPLIER SHOWCASE HOURS (PACIFIC)

Monday, Jan. 18, 8:30 a.m.–4:30 p.m.; Tuesday, Jan. 19, 8:30 a.m.–4 p.m.

ABOUT AMMO RX

Ammo Rx LLC is a veteran-owned and operated ammunition manufacturing partner based in Schaumburg, Illinois. Its team of manufacturing engineers, project managers, a ballistician and a veteran sniper provides equipment, consumables, consulting and project management across case and projectile manufacturing, load, assembly and packaging lines, inspection, and wash, pickle and polish systems, up to complete turnkey ammunition factories. Ammo Rx helps manufacturers start new plants, add capacity and upgrade existing lines, using servo-driven systems, automated inspection and data feedback. Learn more at ammo-rx.com.
