BOOTH 51322

LAS VEGAS, January 2027 — Finishing Rx will show firearm and ammunition manufacturers how to keep parts clean and finishing lines running at booth 51322 in the SHOT Show 2027 Supplier Showcase, held Jan. 18–19, 2027, in the Palazzo Ballroom on Level 5 of the Venetian Expo in Las Vegas.

Clean parts are the starting point for a consistent finish. Finishing Rx supplies all-stainless-steel aqueous parts washing equipment, including dip agitation, cabinet, top-load, belt, rotary drum, rotary basket, monorail and continuous-feed washers, along with Nobles spin dryers, parts washing compounds and corrosion inhibitors. Its wastewater treatment, process water recycling and oil collection equipment helps shops manage the water those lines use. The company also offers custom engineering for washers sized to a specific part and budget.

Finishing Rx also supports equipment it did not sell. Its technical support team troubleshoots, sources replacement parts and services finishing equipment, including units purchased from other manufacturers, and it keeps common parts-washer wear items in stock for quick shipment. Shops that are upgrading, closing a line or holding an unwanted machine can also talk to Finishing Rx about selling used equipment.

Sister company Ammo Rx, which provides ammunition manufacturing equipment and project management, will exhibit at booth 51324.

SUPPLIER SHOWCASE HOURS (PACIFIC)

Monday, Jan. 18, 8:30 a.m.–4:30 p.m.; Tuesday, Jan. 19, 8:30 a.m.–4 p.m.
