Avian-X Expands Motion Duck Decoy Assortment with Two New Launches

Avian-X®, the industry leader in waterfowl-hunting innovation, revealed the expansion of its motion duck decoy assortment with the addition of two revolutionary new duck decoy lineups: the Power Fin and Power Shaker. The **Avian-X Power Fin**, available in four species—Mallard Drake, Mallard Hen, Pintail, and Black Duck—combines two lifelike motions: realistic swimming and natural body movements. Designed to replicate a feeding duck, these decoys deliver subtle body shakes and swimming action for unmatched realism on the water. The first of its kind, the all-new **Power Shaker Teal**, available in both Drake and Hen Green-Winged models, creates lifelike motion at the water's surface, generating waves and ripples that are highly visible to flocks of overhead birds. It features an integrated shaker module molded from high-impact plastic that secures the lithium-ion power pack, capable of delivering up to 18 hours of runtime on a single charge. With unmatched realism, field-proven durability, and impressive runtimes, these decoy assortments give hunters a decisive edge all season, especially when conditions are toughest and ducks are most discerning.

These and other key product displays for the GSM Outdoors brand family will be located at booth #12669 at the Venetian Expo, Level 2.
