KASK

Cycling 2017

Bambino Pro

Everyone has seen the Bambino Pro on the heads of the Team Sky riders. And for those three years the innovative shape and special magnetic visor have been turning heads.

Now the dream is coming true: the Time Trial Bambino Pro helmet is finally available to buy in the best cycling shops all over the world.

The synergistic cooperation between KASK and Team Sky gave birth to the Bambino TT, a helmet developed for extreme road, triathlon, and track cycling performance. The high performing shell is incredibly aerodynamic in all head positions. Wind-tunnel test data shows an outstanding CX rate at any YAW angle.

Ventilation is ensured by the presence of six micro air intakes on the front and four exhaust vents in the rear, connected via an internal air duct system. The visor is integrated with the helmet using a magnetic system. This seamless integration allows continuous airflow and great aerodynamics.

Additionally, the visor can easily be removed and replaced while riding. It is available to accessorise with team kits in three colourways: silver, orange, clear.

Bambino Pro

Bambino Pro Details

3D Dry tri-dimensional padding

The special internal padding is based on an innovative multi-layer open cell construction process that gives maximum comfort and performance thanks to:

- Several ventilation holes that reduce the head-to-pad contact surface by 70% compared to standard designs
- 5mm thick padding material that wicks moisture away from the head and moves it to the helmet's outer shell – fast
- Excellent three-way evaporation

Multi In-Moulding technology

This innovative system guarantees greater safety and increased protection thanks to the polycarbonate layer that covers the shell on the top, on the base ring and at the back.

Chin pad with eco-leather chinstrap

The anti-allergy, washable chinstrap is extremely comfortable and helps prevent skin irritation. It incorporates soft lateral spacers which, thanks to their shape, allow excellent ventilation and avoid that unpleasant 'sweaty strap' feeling.

CoolMax® padding

Removable and washable inner padding is a Sanitized® treated textile.

Self-adjusting lateral divider

This provides great user comfort with minimal adjustment required. After putting on the helmet and fastening the chinstrap, you don't need to do anything else as the divider moves to fit comfortably around the ear lobe. The ergonomic design means a great fit for all head shapes and sizes, guaranteeing freedom of movement and excellent ventilation.

Infinity

KASK

Cycling 2017

Infinity

€215, \$369,95, £169

The Infinity is a category-defining helmet. The first to feature fully adjustable vents which close for maximum aero performance, and open for optimum ventilation.

Size:

M - 52-58 cm / 20^{1/2} - 22^{7/8} inches

L - 59-62 cm / 23^{3/8} - 24^{1/2} inches

Weight:

310 gr. M Size (CE EN 1078)

Colors:

Black/Lime, Black/Red, White, Red, Black

Accessories:

Winter Cap, Internal Spare Pad,
Anti-insect Grid

CE EN 1078 - CPSC 1203 - AS/NZS 2063

Infinity

Revolutionary, the Infinity's exceptional versatility and ventilation make it the ideal choice for professional and competitive cyclists alike.

As developed with the Grand Tour winning Team Sky, our brief was to come up with a helmet that combined the same aero advantages as our fully closed helmets together with the cooling effects of a fully vented road race model. Produced using our innovative In-Moulding system, the Infinity is truly special in that it offers the same mechanical strength and shock-resistance as our other helmets, but with a mobile aerator for easy in-the-saddle use. Simply open up for temperature management on climbs and close to meet the aerodynamic demands of sprinting.

Even when the vents are fully closed a high level of ventilation is guaranteed by two front openings that feed two airflow channels over the rider's head and out through two rear exhaust ports.

In addition to these adjustable vents, there are other optimal design features to smooth a path through the air: featuring a fully rounded profile, as well as further innovation in the use of a side rib that breaks the airflow, reducing the low pressure air bubble created to the rear of the helmet. The result? Ultra-low air turbulence and minimal drag.

3D Dry tri-dimensional padding

The special internal padding is based on the innovative multi-layer open cell construction process that gives maximum comfort and performance thanks to:

- Several ventilation holes that reduce the head-to-pad contact surface by 70% compared to standard designs
- 5mm thick padding material that wicks moisture away from the head and moves it to the helmet's outer shell – fast
- Excellent three-way evaporation

Aerator position at the top of the helmet boosts safety. The top area is reinforced with an internal plastic sub-structure that increases crash protection and helps maintain the helmet's integrity after impact.

CoolMax® material padding

In the front of the helmet is a highly effective sweat-absorber and it is easily removable for washing.

Self-adjusting lateral divider

This provides great user comfort with minimal adjustment required. After putting on the helmet and fastening the chinstrap, you don't need to do anything else as the divider moves to fit comfortably around the ear lobe. The ergonomic design means a great fit for all head shapes and sizes, guaranteeing freedom of movement and excellent ventilation.

Chin pad with eco-leather chinstrap

The anti-allergy, washable chinstrap is extremely comfortable and helps prevent skin irritation. It incorporates soft lateral spacers, which, thanks to their shape, enable excellent ventilation and avoid that unpleasant 'sweaty strap' feeling.

CE EN 1078 - CPSC 1203 - AS/NZS 2063

Vertigo 2.0

Vertigo is designed for cyclists who demand innovation and performance.

Produced using the innovative In-Moulding system, the Vertigo 2.0 incorporates the Up'n'Down adjustment system that, thanks to its unique double pivot design, gives the most precise and comfortable fit of any helmet. This enables the back of the head to be cradled by the straps which are then easily tightened to the correct tension by a central ratchet wheel. This fitting system is combined together with highly breathable, non-slip EVA padding to ensure exceptional comfort.

The Vertigo 2.0 benefits from new CoolMax® inner padding, new thinner nylon chinstrap and no printing on the Up'n'Down system. It is 20g lighter than the original Vertigo helmet.

The Vertigo 2.0 offers great mechanical resilience thanks to the innovative internal strengthening frame that helps maintain the helmet's integrity after impact. Excellent ventilation is achieved by the 24 air intakes. The self-adjusting lateral divider provides great user comfort with minimal adjustment required. After putting on the helmet and fastening the chinstrap, you don't need to do anything else as the divider moves to fit comfortably around the ear lobe. The ergonomic design means it's great for all head shapes and sizes and guarantees freedom of movement.

KASK

Cycling 2017

Protone

Aerodynamic performance, low weight, maximum ventilation, amazing looks.

The Protone weighs just 215g and uses a 3D Dry padding with a multi-layer open cell construction process to give a more comfortable ride. It has removable and washable inner padding, made from CoolMax® fabrics and its inner padding fabric has been treated using the Sanitized® antimicrobial process. Additionally, its Octo Fit adjustment system guarantees a perfect fit to any kind of head shape.

KASK has also continued to use its Multi In-Moulding Technology to create a polycarbonate cover for the top, base ring and the back of the helmet's shell. This is joined to the inner polystyrene cap via KASK's In-Moulding Technology to improve the shell's shock absorption. Its strengthened frame further reduces the risk of a shock breaking the shell.

Mojito

Small, light and aggressive.

The Mojito has only been in the KASK cycling collection for nearly two year but it quickly proved to be very popular model – everybody loves it. Its light weight and super ventilation meant Mojito was the helmet of choice for Team Sky's high performance riding over this past season.

Produced using the innovative In-Moulding system, the helmet offers a close, comfortable fit because of its Up'n'Down adjustment system. The internal padding material is treated with the antibacterial and antimicrobial Sanitized® process.

The chin pad has an eco-leather chinstrap which is extremely comfortable and helps stop skin irritation.

Rex

The Rex's tough In-Moulding design, extended head coverage and advanced ventilation system provide superior protection and comfort.

With 20 perfectly placed vents, Rex has maximum airflow at slower speeds and in warmer climates, allowing you to stay cool. The optimum airflow is complemented by innovative frontal pads with new technologies which encourage efficient sweat evaporation, providing comfort and temperature management.

The rider's entire head is protected including the Lower Occipital bone in the rear and added temporal coverage in front for additional safety. The Octo-fit adjustable rear fitting system has a wide range of adjustment to fit all head shapes and sizes in complete comfort.

Produced using the innovative In-Moulding system, the Rex offers the same mechanical strength and shock resistance as KASK's other leading helmets. At just 310g the Rex is light weight for the superior protection and comprehensive head coverage it offers.

The Rex has a removable multi-position ratcheting visor and integrated goggle retention clip at the rear for aggressive and demanding trails and competition. There is a Lux Leather chinstrap and integrated camera mount. Visor and Goggle Clip are made from plastic polymer, and the visor screws are aluminum.

Rex

Lifestyle

Elegance and style for city-pedallers without compromising on safety and comfort.

The LifeStyle helmet is exclusive to KASK and will appeal to all those who appreciate elegance, innovation and great design in one practical product.

This helmet is not a matter of style over substance, though. The outer shell is a silk-screen polycarbonate, while the inner shell ring is Polystyrene-covered. Other details such as an eco-leather chin pad, CoolMax® padding for excellent breathability and washability, and a mirror visor all add up to make a great helmet for city riding.

Lifestyle

Lifestyle Details

Excellent ventilation

Four large air intakes in the upper part of the helmet ensure riders keep their cool.

Eco-leather chin pad

Comfortable, padded, this strap is soft and non-irritating on the skin. Adjustable, complete with a quick-release buckle, and washable, too.

CoolMax® padding Removable and washable inner padding is a Sanitized® treated textile.

Mirror visor

This adds the finishing, elegant touch and helps protect the eyes from stones and other small city-borne particles. CE EN 166-EN 14458 certified.

Accessories

Complementary winter padding and visors available.

About KASK

The Company

KASK is an Italian company that was born in 2004 with the purpose of designing, developing and manufacturing helmets for cycling, skiing, mountaineering, climbing, equestrianism, rescue teams and safety at work.

Our mission is to offer products with a perfect balance between technological excellence, functionality, safety and an attractive Made in Italy design. This is what we call a CSD project: Comfort - Safety - Design.

Our expertise in manufacturing high quality helmets has led to collaborations with key sporting teams such as Barloworld and Sky Pro Cycling. The knowledge and input from these professional athletes is integral to our ability to be able to provide all riders with a product that delivers the highest performance.
