

“haoshi” is “good things”, we believe that life is full of happy and interesting things.

haoshi design was established in 2009, named by the Chinese pronunciation “Good things.” In our daily life, emotions are often affected by trifles easily, and it is easy to neglect some “good things” around us which can bring us joyfulness and satisfaction. So we add a kind of purity and peace into our design concept. By using concrete exquisite technical art to present the abstract life concept, designers' life philosophy can present completely and perfectly through the visual art.
