Multi-Functional System Dispense with Pick & Place

GRAND JUNCTION, CO — November 2016 — GPD Global, a manufacturer of precision fluid dispensing systems for high-volume 24/7, low-volume/high-mix, and R&D production, expands the performance of its automated dispense systems to run fundamental Pick & Place operations.

Multi-Functional System demonstrating [both fluid dispensing and pick and place operations](#). The same automated fluid dispensing machine is capable of dispensing fluids and also performing Pick & Place for simple components. Example: Dispensing Thermal Gel and placing Heat Dissipaters. Both the [High Precision Dispensing System](#) (MAX Series) and large format DS Series can be used for fluid dispensing and pick and place operations. Parts/substrates can be presented in trays or pallets.

GPD Global automated dispensing systems with closed-loop process controls deliver uncompromising quality and maximize product yield. Software programming used by the systems is simple and intuitive. The versatility of the systems reduces operator dependencies and manufacturing costs. For a cost-effective, multi-functional dispenser, check out GPD Global dispensing systems.

[About GPD Global](#)

GPD Global is an equipment manufacturer of high-quality, precision, automated fluid dispensing, conformal coating and component-prep systems. The company is an international, state-of-the-art equipment supplier for the PCB assembly and semiconductor industries. It designs and manufactures a variety of automatic fluid dispensing and conformal coating systems. GPD Global also manufactures SMT Cover Tape Peel Tester and Component Prep equipment for Thru-Hole applications. The company is committed to offering premium service to its customers and has sales and customer support affiliates located throughout the world, including North America, South America, Europe, the Middle East and Asia-Pacific.
