## **Accessories for the Manual Fixture series MA 21xx and MA 32xx**

### **Individual functionality for special demands**

To be able to offer our customers the best possible Test Fixtures for their applications we have developed numerous accessories, which are optionally available for our Manual Fixture series MA 21xx and MA 32xx.

All accessories are designed so that they can be used with the complete range of the MA 21xx and MA 32xx series (ideally by the first-off customizing but also for later applications).

Our customers benefit from optimized and well-balanced systems and an enhanced, individual functionality of their Test Fixture.
