

### **Slim, Compact LED Signal Tower Series**

PATLITE's compact signal tower series, MPS, is now also available with M12 connector. The new version, MPS-C, is as before the variant MP-C compatible with the international standards and market-leading connection system in automation

The MP and MPS series signal towers are distinguished by high-power LEDs and patented Prism-Cut lenses for optimal visibility. At the same time the LEDs are particularly energy-saving. The individual elements are made of heat-resistant, impact-resistant polycarbonate resin, which is characterized by high durability and transparency. This ensures optimal visibility from any direction and distance. The MP/MPS signal towers are particularly narrow at a diameter of only 30 mm. Their compact size is ideal for small machinery. The MP-series devices come to a height of 220 mm, while the devices of the MPS versions are only 45 mm high.

The slender signal towers with silver finish are especially suitable for compact systems and are installed by direct mounting with only one hole. M12 versions feature up to 4 colors (red, yellow, green, blue). The connecting cables of the signal towers are suitably color coded to the LED modules, facilitating the connection and assignment. The M12 connector, which is now for the first time integrated into the execution MP-C as well as in the MPS-C variant, now allows for more versatile connection options. Since the standardized round plug has established itself in automation technology, universal compatibility is ensured for existing infrastructure.

PATLITE has provided optical and acoustic alarms for more than six decades. Besides rotating beacons, audible alarms and OSH lights, a wide-range of LED signal lights is included in the company's portfolio, with US sales headquarters in Torrance, CA.

#### **ABOUT PATLITE**

Founded in 1947, PATLITE is a leading provider of innovative LED status indicating lights, sound alarms, visual and audible communication network systems and solutions which enhance the safety, security and comfort of workplaces and communities. The company's products and services help improve the quality control, productivity and safety of industrial automation, commercial, municipal and governmental customers. PATLITE has more than 600 employees and has wholly-owned sales subsidiaries in the USA, Germany, Singapore, Korea, Thailand, Taiwan, and China.
