15 December 2016

Pillarhouse USA Has Strong 4th Quarter Performance

Pillarhouse USA shows great prospects for 2017

Elk Grove Village, Illinois, USA – 15 December 2016 – Pillarhouse USA Inc. today announced

With the end of 2016 fast approaching, Pillarhouse USA Inc. are pleased to report that, after what has been a difficult trading year for many US companies, they are bucking the trend and their Q4 sales are proving exceptionally strong.

When asked for comments on the Pillarhouse USA's recent performance, Jonathan Wol, President, commented "Following average Q2 sales figures, we saw a large increase in overall sales activity and purchase orders placed in Q3. The fourth quarter has exceeded our expectations and indicators show we should expect more of the same as we approach 2017. Furthermore, our release of exciting new equipment at IPC APEX 2017 in February should add an additional boost to our sales. Our expectations are high for a possible record breaking 2017".

Pillarhouse USA is attending IPC APEX 2017 and will be demonstrating a fully functioning production line consisting of a 3-cell Fusion and Synchrodex Selective Soldering Systems. These will also be running an implementation of Smart Factory 1.0 (Industry 4.0), with a real-time feedback of production line status. Pillarhouse USA will also be launching the Jade Mk IV. The Jade platform is the world's most successful hand load Selective Soldering System, and the Mk IV will add new process features to this industry leading platform. Pillarhouse USA Inc. will be on stand #1323.
