SMART Storage Systems – Visit Inovaxe in Booth #1725 at APEX

DEERFIELD BEACH, FL — January 2018 — Inovaxe is pleased to announce plans to exhibit at the 2018 IPC APEX EXPO, scheduled to take place Feb. 27 - March 1, 2018 at the San Diego Convention Center in Ca. The Inovaxe team will showcase the new SMART MSD storage solution, as well as its new SMART Stencil Storage solution in Booth #1725.

The SMART MSD Cart improves on Inovaxe's patented InoMSD Cart by adding intelligence to each individually isolated hive. The SMART MSD Cart detects when a hive is opened and closed, and can light up to indicate to users where an MSD part is located. When an MSD hive is accessed, the SMART MSD Cart shuts down its air circulation so that no other location sees a rise in humidity. This patented design gives customers true moisture control for their moisture sensitive devices. The SMART MSD Cart can be used in conjunction with Inovaxe's other smart storage solutions and software, including InoAuto, InoView, and the InoMSD Tracking Software that tracks the life of moisture sensitive parts on the line based on MSL standards.

Inovaxe is also excited to showcase its new SMART Stencil Storage Cart, allowing customers to quickly put away and retrieve solder stencils. When putting a stencil away, the customer indicates the stencil number by typing or scanning, and simply adds the stencil into any open location. The SMART Stencil Storage Cart detects where the stencil is placed. When a stencil needs to be retrieved, its location is illuminated, allowing the customer to simply remove the lit stencil.

Additionally, Inovaxe will showcase other InoAuto SMART storage solutions, including reel storage, mechanical bins, and more. The SMART InoAuto ultra-lean material handling systems enable users to locate parts in less than four seconds and return a part in less than eight seconds. The carts are mobile, store 560 reels in 0.23 m² or store 1120 reels in 0.42 m², and the ROI is less than six months. Inovaxe has provided manufacturers with the capabilities to substantially streamline their material handling systems and achieve the following benefits:

- More than 90 percent labor reduction in pulling kits and returning parts
- More than 90 percent space reduction for storing SMT parts and kits
- Reduction of set up time and increase in machine up time
- Reduction of operator travel time by 60 percent
- Eliminates paper for kit pull and feeder loading operation
- Drastically enhance inventory accuracy without counting parts
- Substantially reduce errors in the feeder set up operation
- Typical ROI is less than three to six months

Inovaxe offers integration with Panasonic SMT equipment through PanaCIM (8 and 10) software.

For more information about how Inovaxe's innovative material handling systems and services can improve your inventory accuracy, reduce storage space and reduce your labor costs, visit www.inovaxe.com.

About Inovaxe Corp.

Inovaxe Corporation is focused on delivering innovative production and inventory management solutions to the electronics industry. The Company's product offering includes Smart and Passive storage carts and racks (InoAuto, InoBin, InoTube, InoTray, InoReel, InoCarts and InoKits) and Moisture Sensitive Device Material Storage Hardware (InoCart MSD), an inventory/kitting software management tool (InoView), and InoAuto Locator software for locating components. For more information and a demonstration of Inovaxe product offerings, visit www.inovaxe.com.
