

## Company Introduction

### WHO WE ARE

Anhui Botai Circuit Science and Technology Co. Ltd. is one of the market leaders for PCB & PCBA business in China. As a high-tech joint-stock enterprise in semiconductor, printed circuit, integrated circuit, LED lighting R&D production and sales, the company covers an area of over 22000 square meters, with a total investment of 110 million yuan in fixed assets. With 600 employees, our annual turnover is over 420 million yuan.

Our printed circuit and integrated circuit are widely used in communications equipment, IT peripherals, smart appliances, automotive appliances, medical equipment, digital products and other consumer electronics. With the continuous development of the Internet of things, printed circuit with the "mother of semiconductors" has more extensive space for development. The latest ceramic substrate developed by our company is a product of high technological content. It adopts a special ceramic powder process and has better heat dissipation. In addition, we also provide high frequency mixing boards for RF applications and aluminum substrates for LCD-TV.

### WHY CHOOSE US

Quality is our culture. Our value message is with us your money in safe your business in safe. All our products are coming with CE & RoHS and UL certificates. We had the honor to serve some big brand customers all over the world, such as CHINT, Delixi, Shimmer, Philip /LG and other large enterprises. Our main markets are Europe, North America, South Korea, Japan, Central Asia, etc.

We are adhering to the "positive, cooperative, efficient" business philosophy and the "excellence, continuous improvement, energy saving, sustainable management" principle of quality. Provide our customers with excellent products, good service, reasonable price, and fast delivery.

## Our Advantage 我们的优势

### Professional 专业

Our general manager Mr. Chang takes PCB manufacture as his cause and all his life, not a business investment. Dedicated to the PCB manufacture field more than 20 years. Attention in the manufacture of PCB to the learning and growth, focus on PCB manufacture the development of the market dynamic, closely follow market development demand, traditional operation technology and new technologies are shirt-sleeve, bring up a group of professional industry maker and managers.

### **Comprehensive 全面**

We are comprehensive, so when you cooperate with us, which means you find several PCB manufacturers at the same time. We also develop new technology, not only the old products. Rigid PCB, flex PCB, aluminum PCB, Rigid and flex PCB combined, 1-8 layer PCB. The traditional single and double side PCB with carbon surface, new HDI PCB etc. We can meet customers' needs.

### **Comprehensive price advantage 性价比**

QUALITY IS OUR CULTURE.

Property capabilities-we are the first batch of PCB factory which has own workshop property, land property of factory and the protection environmental standard of license.

Price-because we have our own independent industry property, so less in lease cost. And with geographical advantage of export and transport cost less, therefore we can provide good quality same as big company and competitive price same as small company.

### **Service 服务**

We put the service above profit, not only tend to have profit products (double or multilayer PCB), sometimes in order to give customers comprehensive service, we also help customers to manufacture some products with small profit or no profit, seeking a comprehensive service. Service form is flexible, including sample, small order, large order, urgent order, etc. And we have a professional after-sales service team.
