**KIC Awarded for New WPI Wave Soldering Optimization Tool**

**San Diego — November 2021 —** KIC received a 2021 Mexico Technology Award in the category of Process Control Tools for its new WPI – Wave Process Inspection. The award was announced during a ceremony that took place Tuesday, Nov. 2, 2021 during SMTA International in Minneapolis, MN.

From Miles Moreau, General Manager at KIC: “The whole KIC team is very proud of this award and the success of the WPI. Along with industry leading profiling setup and optimization tools, KIC has always taken pride in inventing the entire category of real-time inspection and monitoring for reflow and wave soldering. The WPI takes this to the next level, and as always KIC is leading the way”

WPI brings KIC’s award-winning technology and thermal experience to the wave solder process. Wave Process Inspection provides users with automatic profiling – including an industry first dwell time and parallelism measurement for each production board – real-time preheat and wave analytics, automatic SPC charting and more.

KIC’s 45 years of experience in automated process data collection, direct service and support offices in every region, and more than 25,000 systems in the field brings the most reliable, accurate and innovative solutions for electronics manufacturing thermal process tools.

The Mexico Technology Awards acknowledge the latest innovations available in Mexico produced by OEM manufacturing equipment and materials suppliers during the last 12 months. For more information, visit [www.mexicoems.com/mta-awards](http://www.mexicoems.com/mta-awards).

*Move toward the future with full line connectivity, flexible production, data analytics and real-time insight, making sure to include your ovens and wave solder machines. For more information about KIC, visit [www.kicthermal.com](http://www.kicthermal.com).*
