Cogiscan & iTAC to showcase the next evolution of SMT digital transformation at APEX 2022

Cogiscan & iTAC

To Showcase the
Next Evolution of SMT Digital
Transformation at APEX 2022

BROMONT, CANADA, December 6, 2021 — Cogiscan, the leading connectivity and TTC solutions provider for the electronics manufacturing industry, is proud to co-exhibit with iTAC Software AG for IPC APEX EXPO 2022 at booth 3121. Since the acquisition, Cogiscan and iTAC have joined forces to offer the best and most comprehensive shop floor control within the electronics manufacturing industry.

"Coming on the heels of a very successful Productronica show, we are eager to continue the exciting momentum of sharing our collaborative SMT solutions with our colleagues, partners and customers," commented François Monette, Chief Business Development Officer at Cogiscan. "2022 promises to be our best year yet as we are anticipating the most significant growth in our corporate history thanks to our complete portfolio of smart factory solutions. The return to an in-person APEX show is an excellent kick-off to the year."

Additional new products on display will include the newly released *TTC Fix*, a complete traceability solution for digital PCBA inspection and repair, as well as an advanced planning and scheduling module developed in partnership with Dualis.

Cogiscan's ultimate goal is to guide clients along the factory data journey – to achieve a personalized smarter factory with our modular platform of advanced connectivity and data management infrastructure and intelligent TTC applications.

"Electronics manufacturers are under tremendous pressure to address new challenges in supply chain visibility, factory connectivity, and quality control – and all with less people to get these jobs done," commented Mitch DeCaire, Director of Business Development at Cogiscan. "We believe our portfolio of solutions position us to help the SMT market address these issues most effectively and holistically. I look forward to sharing more at the show."

About Cogiscan
Cogiscan is the leading connectivity and track, trace and control (TTC) solutions provider for the electronics manufacturing industry. Cogiscan's scalable IIoT platform perfectly integrates with all major equipment types and is highly configurable to enable a personalized solution to each customer's specific production needs. With installations around the globe, Cogiscan's solutions have helped to transform and optimize manufacturing operations in over 450 factories. For more information, please visit cogiscan.com.

About iTAC
iTAC Software AG, an independent company of the mechanical and plant engineering firm Dürr, provides internet-enabled information and communication technologies for the manufacturing industry. Founded in 1998, the company is one of the leading MES/MOM providers. The iTAC.MOM.Suite is a holistic Manufacturing Operations Management that is used worldwide by companies in different industry sectors such as automotive, electronics/EMS, telecommunication, medical engineering, metal casting and energy. Additional services and solutions for implementing IIoT and Industry 4.0 requirements complete the portfolio. iTAC Software AG is headquartered in Montabaur, Germany and has offices in the USA, Mexico, China and Japan and has a worldwide partner network for sales and service. ITAC's philosophy is to connect people, data and systems.
