Altix Receives Repeat Order for Multiple AcuReel Platinium Contact Printers

ALTIX | 08-09-2021

Altix is delighted to have taken their partnership with Ätztechnik Herz to the next level. Ätztechnik Herz pushes the boundary of etching technology to offer cost-efficient solutions at blazing speeds thanks to its Speedline service.

With this new order of two AcuReel roll-to-toll exposure units, Altix is continuing to spread its know-how on the photo-chemical milling market. This model is dedicated to front-to-back (Inner Layer) & image to web (Outer Layer) alignment and boasts tailor-made unwinder and winder for optimal web handling. Moreover, this AcuReel unit will be equipped with Altix's latest Endless Function for continuous exposure of connected images. The newest stitching capabilities of the AcuReel will also be made available to FPC manufacturers.

"As imaging specialists, we are extremely proud of this latest order," affirms Frédéric Baradel, Altix VP, Marketing and Sales Director. "Having customers such as Ätztechnik Herz renew their trust with the purchase of two machines is a real testament to our engineering team's efforts."

Steffen Herz, Managing Director of Ätztechnik Herz, shares with us the rationale behind the new purchase: "After the positive experience with the existing equipment, we have decided to use Altix for further expansion".
