

THE MANNCORP DIFFERENCE

Working with us, you'll experience first-hand our adherence to the very same principles adopted nearly 50 years ago: Providing the equipment that best serves the needs of its user, pricing it right, delivering it on time, and backing it with after-sale service. It is no surprise we have been a leading provider of electronics equipment since 1967.

THE STORY OF MANNCORP

Manncorp is currently housed in manufacturing facilities in Pennsylvania and California. Our team is proud of where we are now and our history - from the back of Henry Mann's station wagon in the 60s to today.

Hatboro, PA

San Diego, CA

1967

- Henry Mann Co. was started in a garage, in the back of a '66 Dodge station wagon.
- Mann set his company apart through direct-mail marketing.

1970s-1980s

- The garage was replaced by a small office.
- Handmade tweezers for placing components evolved into pick & place machines.
- The one-man operation became a team of people.

1990s

- Took the name Manncorp.
- Established a West Coast branch in San Diego, CA.
- Became first in the industry to put pricing online.
- Created the first digital catalog for SMT equipment.

2000s-2010s

- Added LED placement machines & printers for the expanding lighting market.
- Began producing LED lighting in-house with sister company, LED Living Technology.

2020-Today

- Upgraded East Coast office to a 35,000 sq. ft. facility in Hatboro, PA.
- Increased offerings to include remote services in light of COVID-19.

TOP MANNCORP PRODUCTS

STENCIL PRINTERS

Whether you are looking for complete automation, precise repeatability, or easy flexibility, Manncorp has a stencil printer that can meet your company's specific needs. From low-, medium-, high-volume PCB assembly, Manncorp machinery will provide dependable solder paste printing.

PICK & PLACE MACHINES

Manncorp can provide a high-quality machine, for all types of PCB assembly; prototyping, high-volume production, high-mix SMT assembly, circuit board assembly with frequent job changeovers, and LED assembly are all covered.

REFLOW SOLDERING

Convection reflow systems to meet any production need; in-line or batch, lead-free or tin-lead solder, Manncorp has systems for all levels of SMT assembly. Even the most unique applications can be provided with a Manncorp solution, thanks to our custom equipment options.

REWORK - SMD, BGA, LED

Our rework systems feature advanced optical alignment, automated component removal & replacement, and both top & bottom hot air for de-soldering and re-soldering. When you need to replace defective components, reprogram firmware, or install a daughter board on complex or high-reliability PCBs, you need a rework system that combines ease of use with high precision and reliability.

DRY BOXES

Quickly remedy moisture-related damages to your components and prevent damage from happening in the first place with a high-quality dry storage system. The desiccant dry boxes available through Manncorp prevent humidity from causing popcorning, microcracking, and other issues while safely storing your critical electronic parts and PCBs.
