

Notion delivers several n.jet soldermask systems to the US

November 03, 2022 – Notion Systems GmbH

Notion Systems GmbH, a leading manufacturer of inkjet printing systems for functional materials has shipped two n.jet soldermask systems to the US. They will be integrated into one of the most modern PCB factories in the world and apply the solder resist completely digitally. The main driver for this technology is to save energy, reduce waste, several process steps, space, and make printed circuit board manufacturing more economical and environmentally friendly.

"This order is one of the largest in the history of Notion Systems and shows the innovative power and leading position of the company in the PCB market. The digital printing of solder resist has reached market maturity and will replace conventional processes in the near future", says Antonio Schmidt - SVP Sales & Marketing at Notion Systems.

Notion Systems – The Future of Additive Manufacturing

Notion Systems GmbH is a leading supplier of industrial ink jet printing systems. The n.jet inkjet platform from Notion Systems is used to produce printed circuit boards, OLED & QLED displays, sensors and high-quality 3D parts. Notion Systems relies on decades of experience bringing precise inkjet systems to customers and scaling up digital printing processes for functional materials. Notion Systems is based in Schwetzingen close to Heidelberg - Germany and works together with leading sales and service organizations worldwide with focus on Asia, Europe and North America.
