## **iGlobal Stores announces acquisition of Velocity Webworks**

*iGlobal Stores acquires Velocity Webworks*

**St George, UT— September 23, 2015** — Today, iGlobal Stores announced the acquisition of Velocity Webworks’ development resources, bringing web and product development as well as management expertise to keep up with the demand of their popular global eCommerce solutions.

“We are excited to have reached an agreement with the premier web development company in St George, UT.”, said Clint Reid, President and Founder at iGlobal Stores. “The addition of these 22 senior level developers, project managers and marketing team allows us to accelerate change in the market and prove our philosophy that eTailers’ logistical providers can’t solve eCommerce cross-border technology issues on their own. It takes an independent global platform and technology, like iGlobal Stores, that does not have the limitation of building an eCommerce solution narrowly focused around their own logistical services.”

### **A Positive International Business Impact**

One of the challenges faced by the eCommerce industry is finding the right technology to enhance the consumers and eTailers cross-border experience. The world is getting smaller as technology and communications advance, iGlobal knocks down the barriers of doing international eCommerce which helps online businesses meet their full potential.

Many customers have already benefited from deploying iGlobal's Universal Interface solution. By adding this technology to their current platforms, eCommerce merchants now have control of their costs, resources and profits and gain access to worldwide consumers by easily selling internationally. "After a year since signing with iGlobal, we have seen a 500% growth with our international sales," said Jason Stearns, Owner of Flavor West. "Using this advanced technology, we have been able to cut down our turnaround time from 2-3 days to 2-3 hours."

### **About iGlobal Stores**

Founded in 2009, iGlobal Stores (a DBA of iGlobal Exports, LLC) is the worldwide leader in international eCommerce technology solutions. The company offers products and services designed to simplify cross-border eCommerce for businesses and customers.

Velocity Webworks, also based in St. George, brings ten years of software and web development expertise to the table. "Velocity Webworks is the rocketfuel to iGlobal's boosters," says Dan Purcell, founder of Velocity Webworks. "With our powers combined we can achieve better results faster."
