

October 18, 2016 - Charlotte, NC - Kitchen and Bath Business magazine's annual [Product Innovator Awards](#) have been announced, and Federal Brace is elated to have been included for this prestigious honor. The Product Innovator Awards, chosen each year by an esteemed panel of judges made up of industry leaders, are given to the year's trendsetters in the kitchen and bath industry, marking specific products that promise to revolutionize a certain niche within their respective areas. Federal Brace's [Anthem Corner Countertop Support Bracket](#), in their Designer Hidden Corner Supports Line, was given an honorable mention in this year's kitchen products section. Federal Brace has continuously provided innovation in countertop brackets, particularly within their hidden line, with the Lincoln Hidden Support receiving last year's Product Innovator Award.

The [Anthem](#) promises to make just as much of a splash as the Lincoln, as it's sleek flange provides support in an area that, before this innovation, was often problematic to both homeowners, contractors, and commercial developers. A long flange extends from the base cabinet to support overhangs at the awkward, sometimes ill-fitting, corner of an L-shape counter. Short lower flanges that easily fasten to the inside of cabinets remain out of the way of cabinet drawers and ensure that the overhang remains steady and in place, keeping the kitchen, bath, entertaining area, or commercial area safe. The Anthem retains all the cornerstones of Federal Brace's signature luxury - high quality craftsmanship and materials, ISO:9001 certification standards, and a carry capacity far beyond their competitors' products.

Federal Brace's brand manager, Cathy Morgan, couldn't be more excited about their inclusion in K+BB's distinctive award. "We prioritize providing the best products and the latest innovations to our customers. While each bracket has its own strengths, the Anthem's combination of support, design, and a hidden profile makes it a class of its own."
