

A449 material, we stock many 1/2" to 3 1/2" diameter round bars in 20'-0 to 40'-0 lengths. Additionally, we can manufacture using many different grades of material including ASTM A615 rebar, Stainless Steel rods and other assorted carbon steel grades. Our ability to produce within the tolerances prescribed by the American National Standards Institute (A.N.S.I.) make us a valuable asset to our customers.

Established in 1973, J.H. Botts, LLC. is a valuable source to many industries. Our manufacturing facility in Joliet, Illinois was built in 1995 and house a variety of threading and manufacturing equipment.

Getting the correct material is only half of the battle our customers face. Having the material delivered on time is another significant challenge. We stock a majority of the standard size bolts used in the roadway lighting industry, along with bolts for the traffic signal and sign structure industries. We will also custom manufacture to our clients' specific needs.

In addition to threaded products, we manufacture various structural steel items for our customers. These items include Helix Foundations, Grates for Concrete Flared End Sections, and Aluminum Floor Drains. We have some items in stock throughout the year, available for immediate delivery.

Skilled craftsmen who work with pride, desire to excel, and meet the demands of industry, are some of the key ingredients that make. J.H. Botts, LLC a valuable resource to our customers. Competitive pricing, unsurpassed service, and on-time deliveries makes J.H. Botts, LLC. a key provider in the anchor bolt industry

As certified by AISC, we are an approved manufacturer for the Illinois Department of Transportation.
