

CONSTRUCTION INDUSTRY SOLUTIONS

 FOR US, IT'S PERSONAL

BUILDING BETTER SUPPLY CHAIN SOLUTIONS

Between Würth owned companies, Weinstock Bros., Inc and House of Threads, we offer more than **150** years of service to the Construction industry. These companies have served the needs of the construction industry to build some of the nation's most renowned structures, such as the new World Trade Center, Tappan Zee Bridge, Comcast Building, Goldman Sachs Building, Tower A at Hudson Yards, Goethals Bridge and many others.

In construction, an efficient supply chain is essential to ensuring a successful project. Würth understands this importance and provides customers with a solution that provides on-time delivery, reduces cost, minimizes delays, and delivers the right product to finish your job on time and on budget.

As partnerships are formed with large users, the supporting inventory is brought in to the contracting branch's warehouse to facilitate immediate local delivery. Customers are able to virtually eliminate their fastener inventory and depend on Würth to keep them supplied.

WÜRTH INDUSTRY FAMILY OF COMPANIES

VALUE-ADDED SERVICES

- Material traceability strictly maintained by delivery, sequence and lot.
- Lot tracking ... we record and maintain a log for you of all lots used for the job.
- All kegs marked with computer generated labels indicating sequence and lot information.
- Würth retains and stores test results for ready reference.
- Mill test reports provided with your order information overlaid in the margin, making it easy to cross reference and meeting AISC requirements
- Close coordination with the field, orders delivered as needed, eliminating waste and the need to store large quantities of bolts on site.
- Our testing facility is available to test your fasteners, with computer generated reports. Würth will store and retain all test results and mill test reports for ready reference. Close proximity to the site offers prompt delivery when needed.
- Fill in requests at "Job Pricing" with no expedited delivery costs.
- Our large inventory and regular deliveries from North American mills, guarantees availability when unanticipated needs occur.
- Should it be required, technical representatives from our North American suppliers are readily available (as compared to overseas product where manufacturer support is limited}
- Weinstock offers Teamster deliveries in "Scale Boxes", on flat bed truck, with fewer "picks" for the crane. We offer our technical expertise to solve any bolting issues.

QUALITY ASSURANCE

Würth has a Global Supplier Quality Engineering (SQE) Network with Supplier Quality Engineers around the world. We utilize one audit format to ensure global consistency. Suppliers are continuously audited in an effort to ensure our suppliers have corporate and social responsibility processes in place, have sound manufacturing practices and a good supplier quality program themselves.

Würth provides trust and certainty to their customers when it comes to product testing. With our A2LA accredited quality lab located in North America, our four additional ISO 17025 accreditations globally in both Europe and Asia, and our lab in South America, we are able to do more than just ensure the quality of incoming goods, but can offer testing services to our customers.

WÜRTH WEINSTOCK BROS., INC

Since 1898, Weinstock Bros. Corp. has been meeting the needs of Structural Steel Fabricators and Erectors. We started as a small family owned business in New York City. As the steel industry made the city soar around us, we grew as well, by providing our customers with "What you need, When you need it!"

WEINSTOCK BROS. LOCATIONS:

- **New York (Headquarters)**

New World Trade Center, NYC

We supply a full line of supplies, tools, safety equipment and machinery for Steel Fabricators and Erectors. Weinstock Bros. Corp. has a unique selection of tools and materials for the construction industry.

Our team at Weinstock is dedicated to providing customers the best service possible. Comprehensive product knowledge and experience give our staff the practical background to serve you in an efficient and professional manner.

WÜRTH HOUSE OF THREADS

In April 2016, House of Threads was acquired by the Würth Group. With this acquisition, it has allowed us to expand our footprint and resources to better accommodate our customer base. We are now part of the largest fastener organization in the world!

Our growth has been centered on the heavy construction industry, which includes large industrial projects, bridge construction, complex steel structures, and high rise buildings. Our more than 750,000 square feet of warehouse space contains more than 86,000 line items of fasteners.

TappenZee Bridge, NYC

HOUSE OF THREADS LOCATIONS:

- **Alabama (Headquarters)**

Serving the South, Southwest, Midwest, and Mid-Atlantic states

Goethals Bridge, NYC/NJ

House of Threads began operations in Tampa, FL in 1963. During our more than 50 year history we have grown to twelve locations staffed by more than 100 employees. We have experience delivering product in every corner of the United States and worldwide.
