

All your project work can be tracked quickly and easily with the use of the Customer Portal. As an AISC Full Member we understand the requirements for order tracking, Mill Test Report downloads, and LEED Documentation.

We sell exact lengths and pieces eliminating the need to purchase minimum quantities set by producers. Cutting edge software allows us to nest the material required to minimize scrap while optimizing weight and reducing costs.

Projects change over time and so do your material requirements. Utilizing our inventory is your biggest advantage. We are flexible with modifying changes to your orders and can easily substitute sizes, lengths, and grades at a moment's notice.

Our inventory is your inventory, and partnering with us gives you access to one of the largest in the country. Simply put our strengths are quantity, diversification, and availability.

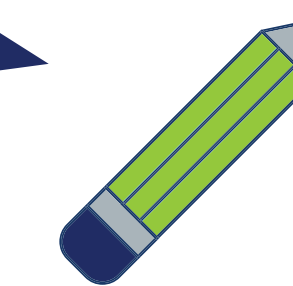

REDUCED OVERALL INVENTORY ON HAND

PROJECT/ORDER TRACKING

ABM/RFQ

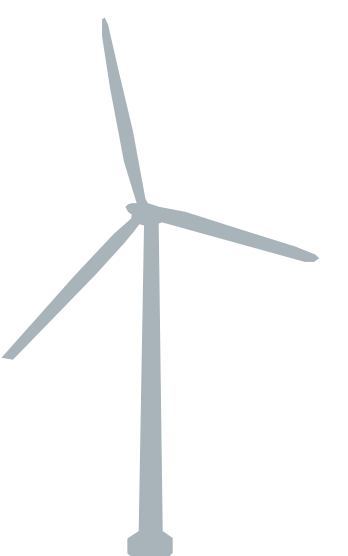

REACT TO CHANGE ORDERS & REDESIGNS

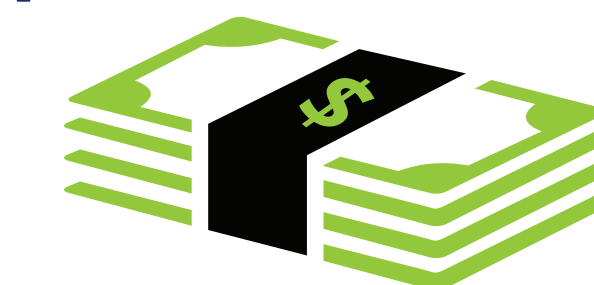

KNOWLEDGEABLE & EXPERIENCED SALES STAFF

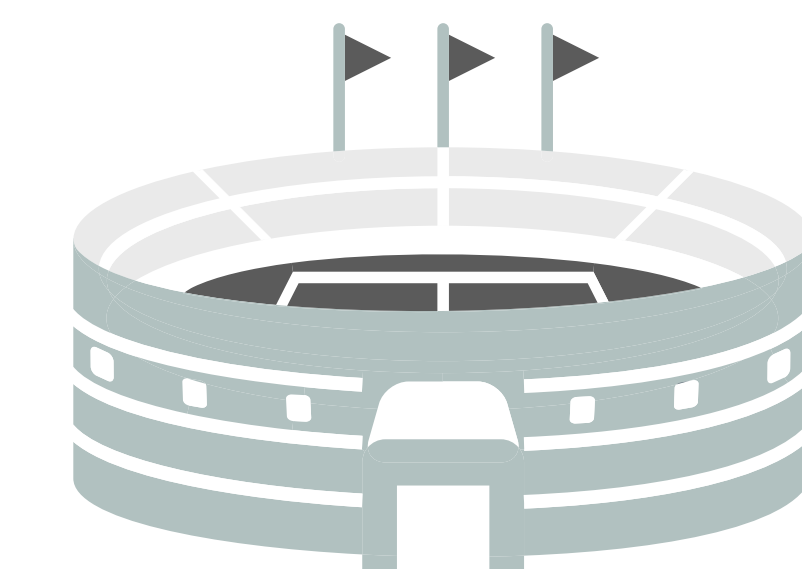

All of our facilities employ an experienced and dedicated Sales Team as well as an onsite Plate Processing Coordinator versed in CAD software solutions.

MAXIMIZE CUSTOMER CASH FLOW

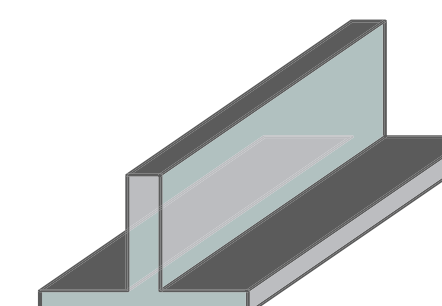

Using our inventory frees up cash flow and space for more productive fabrication processes.

INCREASE SHOP CAPACITY

Consider us an extension of your shop by utilizing our various processing capabilities.

- Saw Cut
- Press Break
- T-Split
- Plate Processing
- Camber
- Blast & Prime

IMPLEMENT CUSTOMIZED DELIVERY SCHEDULE

By operating our own fleet of trucks, we offer a flexible delivery schedule to accommodate the day to day needs and shop availability. We can store, stage, and sequence your project with just-in-time delivery.
