Ergotron's Award-Winning JÜV Wall Launches to the Contract Furniture Market

Ergotron's wall-mounted height-adjustable worksurface is now available to ship to contract furniture dealers

Ergotron, Inc., the movement company that builds kinetic work environments to help people thrive, announced today that the JÜV Wall height-adjustable worksurface is now available to ship to contract furniture dealers.

The JÜV product family debuted at NeoCon 2018 and won a Grand Award in the Product Innovations Awards issued by BUILDINGS media. JÜV Wall was designed to rejuvenate new or existing spaces in commercial environments. With height-adjustability and a flip-down worksurface, this flexible desk integrates easily into offices, allowing businesses to fully realize the potential of their space.

"Our product innovation team researched how the workspace is used in modern offices and found that many spaces remain unused and stationary," said Cathi Vergin, general manager for the office vertical at Ergotron. "We saw that height-adjustable furniture integrated into building architecture would support more active, flexible and collaborative work environments."

JÜV Wall augments corporate wellness initiatives by encouraging healthy workstyles and movement throughout the day. With patented Constant Force™ Technology, the worksurface can be adjusted quickly and quietly from sit to stand. In fact, users can change positions eight to 10 times faster than with a traditional height-adjustable table. An infinite braking system allows the desk to be positioned at any height which provides a comfortable, personalized fit. In addition, the desk was designed without floor supports, which provides ample legroom and storage space.

"JÜV Wall has a feature set that is unique in the marketplace—it's an industry first," explained John Blomstrom, lead designer of furniture at Ergotron. "Using Constant Force Technology, this non-electric adjustable worksurface provides full BIFMA ergonomic height range of 26", accommodating the 5th percentile seated female to the 95th percentile standing male. Combined with integrated power and data accessible at the users' fingertips and customizable accent panels, JÜV Wall is an exceptional solution that adapts to a wide variety of people and commercial settings."

JÜV Wall is now available exclusively to contract furniture dealers. To learn more about the JÜV product family, visit contract.ergotron.com or call (855) 365-6747.
