AtlasMasland Introduces Hangout, a Versatile Carpet Collection Designed for Everyday Spaces

May 15, 2020 -- AtlasMasland, a leading commercial flooring producer, today introduced **Hangout**, a collection of two styles available in both broadloom and carpet tile designed for the tenant improvement market.

Manufactured with 100 percent solution-dyed Universal Fibers® type 6 nylon, Hangout offers two versatile all-loop patterns. Stay Awhile is a smaller scale tailored linear geometric pattern, and Settle In is a larger scale pattern with a disrupted grid.

“Carpet for the tenant improvement market must be versatile and easy to use but that doesn’t have to mean sacrificing on style,” said Elena Córdoba, executive director of design, product development, and marketing for AtlasMasland. “We designed these linear, gridded patterns and then intentionally jumbled them up so that these products do not require pattern matching.”

Hangout’s color palette includes an essential blend of six adaptable neutrals and grays that can be utilized in an array of environments.

“Hangout provides a quiet backdrop that delivers an interesting floor that doesn’t compete with other interior furnishings and finishes,” said Córdoba. “I do see potential crossover application to the corporate market.”

Based in Saraland, AL, AtlasMasland is a leading marketer and manufacturer of quality commercial flooring, serving the corporate, healthcare, hospitality, retail, education, and institutional markets with broadloom, modular carpet, luxury vinyl tile, and area rugs. An industry innovator, AtlasMasland consistently delivers high-end design and sophisticated, statement-making patterns while excelling as a styling leader with products that exemplify originality, sustainable construction, and enduring beauty. As the commercial division of The Dixie Group, AtlasMasland has a heritage of craftsmanship that spans more than 150 years.
