

To: All Sales USA Representatives

Faeron is here!

It's finally here: the award-winning Faeron seating and tables collection is now available, and its extensive range of literature is now available too!

Faeron has been expanded to include several additional product models (including Highback and Wingback lounge chairs), and a range of other enhancements have been made - including increasing the weight rating to 500 lbs, and lowering the seat height slightly to 19".

Because Faeron offers such a broad and multi-faceted range of products, for the literature we've created three main product groupings: Faeron Wood, Faeron Metal, and Faeron Lounge. The Lounge collection includes both wood and metal versions and options.

For each of these three groupings, we've created a Healthcare brochure, and "commercial" brochure, and a print version of the brochure. The Healthcare brochures includes healthcare-specific models; the "commercial" brochures show the Faeron models that are most applicable in non-healthcare applications and settings; the print version for each group has a lesser page count than the electronic Healthcare and "commercial" brochures.

Faeron Metal is now in production along with the rest of the product offering: for initial orders, Faeron Metal is being scheduled for ship dates of June 21st and later - for any requirements at an earlier date than this, please contact us and we can attempt any possible improvement.

The Faeron image library and literature package is being added to the website now. If you have not yet ordered Faeron samples and showroom product, please do so!
