

## SnapCab Unveils Office Isolation Pods for the Post-Pandemic Workforce

*Latest products from SnapCab Workspace aim to facilitate social distance in the workplace*

KINGSTON, ON—May 21, 2020—[SnapCab Workspace](#), a leader in the emerging privacy pod market, is pleased to announce the launch of its new line of office isolation pods. The growing line of mobile, standalone offices have been designed to provide safe, private workspaces for both commercial and home office settings that enable social distancing while still allowing productive collaboration.

SnapCab's standard [Meet 4](#), [Meet 6](#) and ADA Compliant [Access](#) products were designed to be spaces for groups of people to meet and collaborate in a comfortable, private environment. In response to COVID-19, these products have been adapted into SnapCab's new **office isolation pods**, fitted with a full-sized desk and catered to the individual's specifications. Optional features include a mounted computer screen, HEPA air filter, temperature control, and more.

Also available now is the new SnapCab **Meet 2 home office pod**. Using a smaller frame than the office isolation pod, the Meet 2 had been designed for the growing need for comfortable, acoustically-treated home offices. Numerous finish options offer near endless visual customization, allowing customers to have their Meet 2 offices perfectly match the aesthetic of their homes.

COVID-19 has had a significant impact on the working world at present and the vision of the workplace of the future. While also developing [products geared to the health care industry](#), SnapCab has identified the need for products like theirs in the transition to the new workplace. Additional products in development include a two-person consultation pod featuring two doors and a glass partition, as well as an outdoor pod with applications in both private and public spaces.

"We're responding to a need for products like ours in the post-pandemic workplace, whether it's teams struggling to collaborate while working remotely, or parents trying to find a quiet place to focus in a house full of people," said Glenn Bostock, Founder and CEO of SnapCab. "Our first thought after the coronavirus outbreak was, 'Will we be able to stay in business?', but we quickly realized our pods could be an excellent solution to the challenges of getting people back to work."

Thanks to SnapCab's long-standing focus on flexibility, safety and modular design, the company is uniquely positioned to adapt their designs to respond to new and emerging needs. However, some pre-existing products have also found applications in post-pandemic workplaces. The [Talk](#), [Focus](#) and [Nurture](#) products were designed to be private, independent workspaces, while the [Connects](#) demountable wall system can create flexible neighborhoods within a larger space in order to facilitate social distancing.

### About SnapCab

For over 35 years, SnapCab has been a leader in developing architectural products that are flexible, high quality and safe to use in a variety of environments.

SnapCab revolutionized the elevator industry with the invention of a system which reduced the time it took to remodel an elevator interior from four days to less than a day. Today, this innovative paneling system is used throughout North America by all the major elevator interior companies and has also attracted the attention of Corning Glass, which now collaborates with SnapCab to make Gorilla Glass available in all SnapCab Products.

SnapCab's fastest growing product line is SnapCab Workspace, a line of flexible, stand-alone, quiet and safe workspaces at the forefront of the emerging privacy pod market. Built to last and customizable to suit any environment, these small mobile rooms have been designed to solve a variety of issues in the modern workplace. All SnapCab Workspace products are UL Listed, seismic certified, air quality tested and easy to clean and disinfect.
