

iQ Optima: Homogeneous Sheet Vinyl Ideal for Healthcare Environments

iQ Optima is a homogeneous sheet flooring product ideal for healthcare environments. Its advanced composition does not depend on a protective top coat, meaning it can be easily restored to its original appearance with simple dry buffing. Also, it is a homogeneous product that can be heat welded, completely eliminating any seams or gaps in the flooring surface. This is important in clinical environments because any seams, scratches or scuffs in the floor can harbor mold or pathogens. iQ Optima makes it easier to clean and maintain facilities where limiting the spread of infection is of utmost concern.

Key Features

- Homogeneous sheet and tile available in 64 colors
- iQ no wax, no finish construction
- Available in acoustic construction
- Certified asthma & allergy friendly®
