

INTERNATIONAL FORTRESS CASH MANAGEMENT

Secure Storage for Daily Cash Management

The Cash Management safe is the centerpiece of daily cash management for retail stores, restaurants and any business environment where accumulating cash in the cash drawer is at risk for armed robbery or internal theft. A most effective loss prevention practice is to transfer excess cash to temporary and secure storage through the workday. The Cash Management safe acts as a convenient and secure way station between the cash drawer and final disposition of daily receipts by bank deposit, armored car pickup, or transfer to a high security safe. The safe deters hold ups and internal theft. *Cash Management safes are not recommended for overnight or unattended storage.*

Depository Safes

Depository safes feature a mailbox type drop-down drawer for fast and easy deposit of cash, money bags, and envelopes into the safe without having to open it. Drops are made into a storage compartment through a one-way deposit system that secures the contents until authorized access is gained through the door.

Utility Chests

Designed for commercial environments, Cash Management utility chests are theft resistant containers suitable for short-term storage of cash trays, rolled coins, documents and valuables.

International Fortress Cash Management

Features

- **Heavy Duty Construction** – Body is solid plate steel construction with a 1/2" solid plate steel door.
- **Front-Loading Access** – Depositories have a smooth mailbox type mechanism which allows for under counter placement of the safe.
- **Fish-Resistant** – International depository safes incorporate an anti-fish baffle to deter a common method of theft where employees and burglars attempt to "fish" the safe contents through the deposit drawer.
- **Bolt Detent** – When the safe door is opened, the chrome-plated bolts remain retracted inside the door to prevent damage to the bolts as the door is closed.
- **Auto Lock Feature** – When the door is fully closed, the locking bolts automatically extend in the safe body, locking the door.
- **Standard Locking Devices** – UL-listed Group II combination locks and single or double nose keylocks are the standard choices for Cash Management safes. All locks are protected by a drill-resistant hardplate.
- **Relocker** – All locking mechanisms are equipped with a spring-loaded device that disables the safe during a forced entry.
- **Anchor Holes** – For extra security, each safe has a minimum of two built-in anchor holes for bolting the safe to the floor.

Options

- **Electronic Locking Devices** – Electronic digital pushbutton locks with operational features – such as programmable combinations, multiple user interface, time delay, and auditing – are a necessity for businesses with heavy daily safe use, multiple users, and frequent employee turnover. Any of our Cash Management safes can be configured with electronic lock devices from LaGard, Kaba Mas, Sargent & Greenleaf, or Millennium Globaloks.
- **Custom sizes and colors** available
- **Locking deposit drawers** available
- Most models available in **right or left swing door**
- **Biometric locks** available

Advanced time-lock mechanism available

F-2820 C

Depository Safes

Three Cash Management depository models are designed with two separate compartments – one for deposit collection and one for storage.

F-2820 C

The F-3020 DD/CC double door depository features two separate compartments, each with its own locking mechanism and external access.

F-3020 DD/CC

The F-2014 C/LOC depository safe with locker provides a great fit for narrow spaces, while affording extra storage for cash trays, rolled coins, and other valuable items. The locker can be equipped with any lock option.
