## Rolled Coin Dispensing

MI-COIN D

# MI-COIN

## FAST AND RELIABLE ROLLED COIN DISPENSING

With 6 drawers designed with 5 channels each, MI-COIN D meets the needs for *secure* rolled coin dispensing in a high-volume environment. Each channel can hold up to 16 rolls of Pennies, Nickels, or Dimes, or can be configured to hold up to 13 Quarter rolls.

To dispense coins, MI-COIN D automatically validates cash inserted into an *accurate MEI Bill Validator*. Bills are stored in a lockable cassette that is access controlled, *providing security for store personnel and the cash*.

An Ethernet interface or a wireless GSM Cellular communication option can be selected, allowing remote access and electronic locking. The ability to function as a stand alone safe or networked system offers *flexibility* for current and future needs.

For busy locations the MI-COIN D is the ultimate coin dispensing safe, allowing your personnel to buy the coin they need.

### MI-COIN D

With 6 drawers of 5 channels each the MI-COIN D can be configured to reliably and securely dispense various coin types.
