WE DESIGN
FUTURE-FRIENDLY PRODUCTS
WITH JOY OF CREATION

We design future-friendly products that touch your heart.
Understanding Korea's long history of creating culture in harmony with nature within nature is at the core of FUNNYFISH design.
We strive to make eco-friendly products that are durable and sustainable.
FUNNYFISH is also driven by the creative force of science and technology.
We make it a goal to design products that inspire our everyday life.

Table Lamp

This table lamp can be easily assembled by combining a wooden stand with a lampshade made of Hanji, Korean traditional paper made from Mulberry. Nature-inspired design gives shape to gentle breeze or a flower bud in the form of a lampshade. Thirty-three pieces of Hanji are put together with snap buttons to construct a lampshade, which are then inserted into the stand. Hanji is not only environmentally friendly but also a great material with fiber texture that allows soft lighting. Aroma oil essence or any perfume can be sprayed onto the shade to enjoy aromatherapy. The lampshade is replaceable with an alternative design. It comes in a sturdy 25mm-thick box, which ensures safe delivery. It is a great gift item.

Pendant Lamp

The lampshade for this vinyl pendant light is designed with the Korean word for "flower" and "moon". The shade can be easily assembled with snap buttons and be attached to E26/E27 international standard sockets to form a chandelier style lighting. Vinyl, an uncommon material as a lampshade, turns into a modern and elegant interior design element combined with Edison LED bulb. The lamp comes in a sturdy 25mm-thick box, which ensures safe delivery. It is a great gift item.
