

SANS

KEEPS YOUR JUICE  
OR SMOOTHIE  
FRESHER, LONGER

SANS is a new and innovative glass travel bottle with a vacuum pump mechanism to remove the air and preserve juices and smoothies.

SANS was developed out of the need to preserve and avoid rapid oxidation of fresh juices and smoothies. During the blending process, fruits and vegetables oxidize, lose nutrients and go bad. We discovered a way to slow down this process to enjoy your juices and smoothies on your time. The SANS lid includes a vacuum pump mechanism which removes air and preserves your beverage with a tight seal.
