## COAST's New Rechargeable Headlamp Provides Ultimate Hands-Free Precision & Brightness for Unparalleled Adventure and Outdoor Experiences

### Rechargeable Headlamp Highlights Breakthrough Features

**PORTLAND, OR, July 15, 2016** –Igniting new technological breakthroughs, COAST Products has added to its headlamp line with the debut of the all-new FL75R headlamp. Offering not only one of the most innovative and brightest – up to 530 lumens but this LED headlamp is now rechargeable. This provides the ultimate hands-free lighting experience and makes it the go-to headlamp for every adventure expedition where reliable gear is a necessity. The FL75R rechargeable headlamp also combines focusing, dual-color beams with COAST's industry-leading optical technology and a compact size. Conveniently, the batteries can be charged inside or outside of the headlamp and also works with alkaline batteries if needed. Get an up-close view of COAST's new headlamps and the company's full array of LED flashlights, headlamps, lanterns, knives and multi-tools during the Outdoor Retailer Show ([OR](#)), from August 3 - 6 at [Booth 28045](#) at the Salt Palace Convention Center.

## **Rechargeable Battery Pack and Light All-in-One**

Top of the line, the FL75R features COAST's innovative recharging capability and combines it with COAST's new series of front loaded headlamps. This powerful, versatile and easy-to-use lightweight headlamp makes every outdoor adventure or trail finding easy by illuminating crystal clear light where and when it's needed.

Featuring COAST's exclusive Flex Charge Dual Power Rechargeable System – including the Pro-Tek Charging Port, a protective cover can be removed to reveal a micro-USB port that the charging cable plugs into the light. There are no parts to lose, and the port stays clean from dust and debris.

With the FL75R's included high-quality lithium rechargeable battery pack and standard alkaline batteries, users have multiple battery options. Notably, the lithium battery can be charged inside the headlamp, or outside, providing users with the option to charge the lithium pack while using alkaline batteries making you ready for any task at any time. There are high, medium, and low output modes to choose between maximum brightness or to conserve battery life.

## **Powerful Multi-Use Functionality. Pure Beam Focusing with Dual Color LED Headlamps**

The FL75R headlamp, along with the entire FL headlamp line, has heavy-duty, adjustable headbands that provide ultimate comfort and include reflective material for increased visibility of the wearer. The oversized power switch lets you change settings with ease, and the bezel is hinged to make focusing and beam positioning fast and easy, particularly for close-up tasks like reading trail markers or preparing your gear for the next day's adventures. The red light function on the FL75R is particularly useful at night for moving about without disturbing other campers and for surveying trail or terrain maps without blinding yourself and preserving your night vision.

Delivering an impressive 530 lumen of power, the FL75R also features COAST's patented Pure Beam Focusing Optic, which allows for seamless transition from a crystal-clear flood beam for up-close use to a long distance Bulls-Eye spot beam to see downrange. It also has both red and white beams. The lights are operated by two separate switches, enabling easy switching from focusing pure beam for far away illumination to red for night vision and low light situations around camp, on a climb or on the trail. Separate switches also allow users to turn on and off the red light without cycling through the white light settings. The FL75R projects a clear, bright light up to 512 feet/156 meters away.

“For every adventure or expedition, COAST's new FL75R headlamp delivers exceptional rechargeable lighting technology,” remarked COAST President David Brands. “The simple-to-use and versatile recharging capability, coupled with the headlamp's impressive power, beam clarity, and runtime, make this the go-to headlamp for any project or outdoor activity. The useful red light feature and remarkable flood or spot beam lighting are an added plus to this headlamp. Whether trekking on all day hikes, climbing through rugged terrain or preparing for a night at base camp, these powerful lights are the must-have headlamps for those who know, and trust, their gear.”

Following are the specs, tested to ANSI FL1 Flashlight Standards. The FL75R requires three AAA batteries for power or use of the Lithium Battery pack.

### **With Lithium Batteries**

- Lumens: 530 (High), 260 (Med), 65 (Low)
- Beam Distance: 156 meters/512 ft. (High), 107 meters/352 ft. (Med), 54 meters/177 ft. (Low)
- Run Time: 2 hours 15 min (High), 5 hours 15 min (Med), 11 hours (Low)
- Dual-LED for red light function

### **With Alkaline Batteries**

- 480 (High), 245 (Med), 65 (Low)
- Beam Distance: 145 meters/476 ft. (High), 106 meters/348 ft. (Med), 54 meters/177 ft. (Low)
- Run Time: 3 hours 15 min (High), 7 hours 30 min (Med), 23 hours (Low)
- Dual-LED for red light function

All COAST LED headlamps also feature unbreakable LEDs and are impact and water resistant. And, they're backed by COAST's lifetime guarantee against defects in materials and workmanship.

The headlamp will begin shipping in late August with a suggested retail of \$109.99. Follow COAST at one of the social media channels below, or check the COAST website for the latest information.

### **COAST Products – A History of Innovation**

COAST Products is a 97-year-old, family owned company that produces lights, knives, and multi-purpose tools for work, recreation, and everyday use.
