VIRUNGA

3L eVent® Hard Shell

Optimized for maximum breathability for greatest wearer comfort whether you are exploring the Congo rain forest or skiing in Utah.

FEATURES:

- 100% Waterproof, Direct venting eVent DV Storm fabric for quickest sweat transport
- 3 layer fabric for durability while hiking in hard brush forest
- Laser cut vents in front and back for enhanced air exchange
- Pit zips for additional venting and moisture control
- Helmet compatible, adjustable hood
- Twin napoleon pockets, 2 pack pockets for easy access while wearing backpack
- Abrasion resistant panels on hip area
- YKK Aquaguard Vislon zipper, velcro cuff adjuster, hem cinch cord
- Waterproof – 20,000 mm, Breathability – 26,000 gsm, Air permeability – 0.1 cfm
- Shell – 100% Nylon ripstop, Tricot – 100 % Polyester
- Available in men's and women's
- **Manufactured in Vietnam**

"On several snowshoe outings that featured a variety of exertion, this jacket did an excellent job of breathing to keep me dry on the inside. The 88 small holes between your shoulders (covered by a flap) serve almost like a drain for your body's heat output."

- Kurt Repenshak, National Parks Traveller

GARAMBA

2.5L eVent® Hard Shell

Light weight 'Garamba' is designed for highly athletic, aerobic activities like trail running in hot & wet or cold and wet conditions.

The water proof, wind proof fabric keeps the rain away while the direct venting eVent membrane whisks the sweat away as soon as it is generated.

FEATURES:

- Waterproof, Direct venting eVent fabric for quickest sweat transport
- 2.5 layer fabric for light weight protection
- Laser cut vents in front and back for enhanced air exchange
- Pit zips for additional venting and moisture control
- Adjustable hood
- 2 pack pockets for easy access while wearing backpack
- YKK Aquaguard Vislon zipper, velcro cuff adjuster, hem cinch cord
- Waterproof – 20,000 mm, Breathability – 20,000 gsm, Air permeability – 0.1 CFM
- Shell – 100% Nylon 40D ripstop
- Available in men's and women's
- **Manufactured in Vietnam**

"Garamba is as cutting edge as it gets. It employs a combination of the most breathable air permeable shell fabric available (eVent DVLite 2.5-layer) with numerous ventilation features to create what can be claimed to be the most breathable hardshell jacket available. For that it merits an A+."

- Will Rietveld , Ultralight Insights

CAYAMBE

3L Deco Taped Soft Shell

Designed for aerobic activities in cold and wet conditions. The amazingly stylish decorative seam tape will turn heads wherever you go.

The water proof, wind proof fabric will keep you dry in everything except heavy downpours while the light weight, textured fleece lining keeps you warm without overheating.

FEATURES:

- Water proof 3 layer 4-way stretch fabric
- Fabric Waterproof rating – 10,000 mm, Fabric Breathability rating – 10,000 g/m2
- Durable Water repellent finish (DWR)
- Decorative seam tape
- Light weight, textured fleece lining for warmth while being active
- Napoleon pocket, Twin zippered, pack compatible pockets for access while climbing
- Pit zips for improved moisture and warmth control
- Adjustable, helmet compatible hood
- YKK Aquaguard vislon zippers, Velcro cuff adjusters, hem cinch cord.
- Available in men's and women's
- **Manufactured in Vietnam**

"I wore it for a solid 8 hours on a hike that was moderate cold rain for the first 2 hours (just above freezing), changing to moderate wet snow for about 5 hours (just below freezing), then moderate rain for an hour. The jacket kept me warm and dry in those conditions. One feature I like is that the inside of the jacket is very comfortable against bare skin, unlike my hardshell."
- Eric , MIT Outing Club
