## **PRESS RELEASE**

### **FOR IMMEDIATE RELEASE**

#### **Flying Circle Launches New Gun Cases at SHOT Show**

Flying Circle, a key supplier of field, tactical, and travel bags to the U.S. Military, introduces its new line of gun cases during the 2019 SHOT Show in Las Vegas.

**Boerne, TX, January 9, 2019** – Expanding on the success of their original line of gun cases, Flying Circle will unveil its newest offering of semi-rigid cases at the SHOT Show in Las Vegas January 22-25. This will be the company's first time exhibiting at the show.

The new line includes a Pistol Case, Single Rifle Case, Double Rifle Case, Breakdown Case, and Shotgun Scabbard. The Pistol Case is offered in black, coyote brown, and MultiCam® fabric. The large cases are available in black and coyote brown. The thickly padded cases are constructed with durable water-resistant fabric, provide superior protection in a lightweight design, and are perfect for a variety of shooting sports.

The Pistol Case holds most handguns up to 11" long and features an elastic cargo net inside to hold the firearm firmly in place. Lockable zippers add an extra layer of security on the firearm compartment. Other features include MOLLE straps to attach compatible gear and an exterior accessory pocket for extra ammo and other small items needed for a day at the range.

The Single Rifle Case and Double Rifle Case accommodate firearms up to 51.5" long. Each case includes MOLLE webbing with Velcro® loops inside to hold weapons in place, large exterior pockets with 180-degree zippers to carry lots of gear, and a unique 4-point Vehicle Attachment System with adjustable webbing and side release buckles to secure the case to a SUV/ATV roll cage or cargo rack, keeping the rifles safe and easily accessible. Other convenient features include lockable zippers, end loops for hanging or pulling, short handles, and a padded adjustable and removable shoulder strap. The cases can also be customized with patches using the Velcro® strips on the pockets. The Double Rifle Case makes a great 3-gun competition bag because of its ability to hold multiple firearms and loads of ammo.

The sturdy Breakdown Case offers outstanding security and protection when transporting rifles and shotguns that come apart at the receiver. The thickly padded semi-rigid exterior protects the stock and barrel and helps minimize bumps and dings. There is an exterior pocket for ammo or paperwork, and it has many of the same features as the other rifle cases, including a 4-point Vehicle Attachment System, lockable zippers, padded adjustable and removable shoulder strap, and end loops.

The Shotgun Scabbard protects a range of shotguns from 46" to 54" long. It features an adjustable closure flap to cover the entire shotgun. The closure flap also has a slip-in pocket

inside. MOLLE webbing on the front can be used to attach the scabbard to a pack or vest and for the addition of pouches and other gear. It also has a 4-point Vehicle Attachment System and shoulder strap.
