My company has been making and serving all kinds of tactical soft cut and sew bags, gun cases for many clients in this industry for over 7 years. We have the facilities in **China, Myanmar and Cambodia**. We are looking for new opportunities to expand our business to make the bags for your possible new needs.

**With the advantages of import duty free from Myanmar and Cambodia to USA**, we have the strong advantages to offer you best quality of bags with best available market prices. Below are the brief introductions of who we are and what we can make:

#### **Facilities Overview:**

As a high quality and high volume cut and sew manufacturer of nylon and polyester fabric made tactical backpacks, computer bags and travel bags, we own two large manufacturing facilities in Shenzhen, China; utilizing over 300,000 square feet in production space and 3000 sewing machines. Additionally, our newest factory in Yangon, Myanmar is a total of 88,600 square feet and has over 500 sewing machines. **These factories are ISO 9001, ISO 9002 and ISO 14001 qualified and approved by Wal-Mart, Target and other large retailers.**

We also have a fully equipped 40-person sample department conveniently located at our Shenzhen factory headquarters with an extensive library of materials, allowing our customers to choose many options for the development of their new products.

#### **Full Internal Control & Production:**

Because of our large cut and sew manufacturing capacity we do not subcontract our production to other factories. This not only allows us to fully control our product quality but also is important to large U.S. corporations who cannot afford the risk of having their production subcontracted to factories that do not abide by established social compliance rules and labor laws.

**We do 100% customized production only.** We don't warehouse any merchandise here in USA and don't do any means of wholesale, on line or retailing business. All goods will be shipped out from our overseas facilities to client's appointed final destination directly. **We respect our clients' distribution channels and position ourselves as the manufacturer only, period.** Please visit [www.unilandusa.com](http://www.unilandusa.com) for a simple and quick review of what we have done. Please feel free to contact me directly should you have any questions or inquiries, thank you.
