Alien Gear Holsters Releases New Chest Holster for Cloak Series

October 1, 2019

POST FALLS, ID – Alien Gear Holsters has released an all-new Chest Holster option, making it the perfect accessory for the outdoors. Ideal for hunters and outdoorsmen alike, the Cloak Chest Holster allows you to keep your firearm within reach at all times while trekking through the underbrush.

Normal hunting or fishing gear can sometimes weigh you down, making it near impossible to reach for a firearm at a moment's notice. The Cloak Chest Holster makes it easy to access your firearm without having to make any unnecessary adjustments.

The base features a strap harness complete with industrial strength nylon straps that attach with sturdy polymer clips. Unlike most clips required to keep the holster taut, these clips do not make excessive noise while you move.

A generous layer of Cool Vent neoprene on the back of the holster helps to wick away sweat allowing your skin to breathe more easily while you carry. The base is also reinforced with layers of spring steel and woven ballistic nylon creating a strong platform for easier draw.

If you already have a compatible shell for your primary carry pistol, you also have the option to order just the base. Like the rest of their Cloak series holsters, you will need to choose the corresponding platform for your specific firearm as well as the best size for comfort.

The Cloak Chest Holster comes complete with a custom-molded shell which you can swap at any time with their lifetime shell exchange program and dial in the retention to your preference.

Backed by their 30-Day Test Drive and Forever Warranty, the Cloak Chest Holster is available now for \$89.88. However, if you already have a Cloak series product, you can order just the base for \$73.88. Order yours today at <http://aliengearholsters.com/>.
