

Official press release

RST RearSightTool is happy to bring for the first time to Shot Show the Gen 4 Universal Field Sight Pusher in its latest “B” Revision.

After 5 years of design, testing and evaluation, we have in our hands not only one of the most effective sight tools ever made, but also the most innovative and useful ever devised. We want your hands to test this fantastic product, and you will not only be able to do so by appointment, but also by checking us at booth #61511 at the upcoming Pop-Up Preview event on January 22nd.

Additionally, we will attend the trade show as a non exhibiting manufacturer the 21st and the 23rd.

Come see or meet us, and don't miss the chance of testing one of the greatest gunsmithing tools ever invented.
